**METHODOLOGY AND ALLOCATIONS**

**METHODOLOGY**

Postsecondary funds are awarded through the annual application process. Eighty-five percent of the Carl D. Perkins Title I funding is allocated to community, state, and technical colleges based on the Technical Pell count.

The following methodology, based on the guidance received from the U.S. Department of Education, was used:

1. Match the Pell recipient social security numbers with those collected on the Financial Aid Database (FAD) to the 001/00A.
2. For all technical majors (including tech-prep and workforce continuing education), calculate the credit hours for all courses (technical courses as well as academic). For continuing education, calculate the contact hours for workforce education courses. Note: type major is reported in item #13C on the CBM001 and the CBM00A.
3. If a student declares a technical major at any point during the year, the student is counted as technical.
4. All included credit hours at a college are added and the respective Full Time Equivalent (FTE) calculated. The same is done for the continuing education contact hours. The FTE is summed for all public two-year institutions (including Texas State Technical College and Lamar). A dollar funding amount for each FTE will be established. Each college will receive the same dollar amount for each FTE based on its credit or contact hours.
5. The hours that are not used in this formula are developmental education courses. All others will contribute to the Pell count.
6. The students who did not declare a technical major or who are classified as type major "academic" are excluded from calculation.
