Description

The [Learning Technology Advisory Committee \(LTAC\)](#) engages in substantive policy research and discussion regarding the role that learning technology plays in Texas higher education. LTAC also reviews and provides recommendations on [Institutional Plans for Distance Education \(IPDE\)](#) to promote the development and delivery of high-quality programs.

The LTAC informs the Texas Higher Education Coordinating Board on critical issues such as:

- the development of distance education institutional collaboratives;
- the development of affordable electronic course resources and learning materials, including open educational resources, textbooks, and other digital learning objects;
- best practices in the evaluation of distance education, including review and update of the [Principles of Good Practice for Distance Education](#);
- the role of online and hybrid education in offering accessible and affordable degree programs;
- partnerships between community colleges and universities that leverage technology to increase the number of degree completion options available to students;
- ways to creatively and innovatively use technology to transform higher education delivery and improve student retention and success, including just-in-time, on-demand academic support services aligned with the goals of [Building a Talent Strong Texas](#).
