

Graduate Medical Education Report: An Assessment of Opportunities for Graduates of Texas Medical Schools to Enter Residency Programs in Texas

Elizabeth Mayer, Assistant Commissioner,
Academic and Health Affairs

1

Texas Education Code, Sec. 61.0661

The THECB presents the following information in accordance with TEC, Section 61.0661:

- A comparison of the number of first-year graduate medical education positions available annually with the number of medical school graduates
- A statistical analysis of recent trends in, and projections of, the number of medical school graduates and first-year graduate medical education positions in the state
- Methods and strategies for achieving a ratio for the number of first-year graduate medical education positions, relative to the number of medical school graduates in the state, of at least 1.1 to 1
- An evaluation of current and projected physician workforce needs in the state, by total number and by specialty, for the development of additional first-year graduate medical education positions
- An examination of whether the state should ensure that a first-year graduate medical education position is created for each new medical student position established by a medical or dental unit
