

Accountability News and Updates

May 2025

Accountability System Updates

Most accountability reports are now available on our website. There are still a few more reports that will be updated in the coming weeks and early summer. These include: High School Graduates Enrolled in Higher Education, Underprepared and Prepared Students Receiving an Award and a few reports related to expenditures and faculty contact hour Interactive Reports.

Accountability pre-defined reports should be available online by mid-May, if not sooner.

Please note: due to change in statute, restricted research expenditures for public universities will no longer be reported. We will start reporting federal+private expenditures in the near future.

February 2025

Accountability System Updates

We plan to start updating the Accountability System with the most recent certified data in mid-February. We anticipate completing the updates and making the reports publicly available by the end of April 2025. Accountability data will be reflective of certified data as of February 4, 2025. Please note that any data that is recertified after February 4, 2025 will not be reflected in the accountability reports online.

Institutional Comments

Institutional comments regarding data presented in the Accountability System are collected via the Institutional Portal. As before, these comments are presented in the Accountability System immediately below related institutional data.

Institutional representatives should periodically check the Institutional Portal once they have certified data relating to any measures for which they wish to enter a comment. Once the Accountability measure has been run and the data has been loaded, institutions may review that specific data and enter a comment. Instructions for entering comments regarding institutional data are provided in the attached institutional portal guide.

Accountability Peer Groups: changes will take effect beginning with this year's Accountability reports. You can find the updated peer group criteria at the links below:
