Austin, TX
August 2021

Texas Higher Education Coordinating Board Annual Texas Success Initiative Assessment (TSIA) Summary Score Report for 2020 Texas High School Graduates by Public School District

Introduction

This report summarizes the Texas Success Initiative Assessment (TSIA) scores of Texas public high school graduates in 2020. Report tables present TSIA average scores by public school district and by race or ethnic group within each district. This report meets the requirements of Texas Education Code (TEC), Section 51.3062(u), with the Texas Higher Education Coordinating Board (THECB) providing the TSIA data for this report on behalf of institutions of higher education statewide.

Note: The TSIA is one way of demonstrating college readiness in Texas. Other reports that consider the comprehensive list of readiness measures can be found on our [Texas Higher Education Data website](#), and policy information is available on the [Texas Success Initiative website](#).

Data Sources

<i>Received from the College Board</i>	Texas Success Initiative Assessment (TSIA) scores of students who tested at either a Texas higher education institution or within a public school district testing site from June 2011 through October 2020
<i>Received from the Texas Education Agency (TEA)</i>	TEA student records for the class of 2020 Texas public high school graduates

Matching Methodology

The Texas Higher Education Coordinating Board (THECB) receives Texas Success Initiative Assessment (TSIA) scores of students who had tested at either a Texas higher education institution or within a public school district testing site from June 2011 through October 2020 from the College Board. The Texas Education Agency (TEA) matches the 2019-20 annual graduates file in PEIMS with the TSIA data, using an algorithm that includes the graduates' SSN, first name, last name, and date of birth. Then, the TEA uses an identifier in PEIMS to connect students to the graduating campuses.

Student Privacy and Data Suppression

The THECB suppresses information that could be used to identify individual students. The THECB took the following steps to protect the privacy of students within the state:

- No TSIA data were shown where the number of TSIA test takers in a district is fewer than 100. For these districts, THECB plans to provide a "small N report" every three years.
- TSIA data for any ethnic group with fewer than five test takers were suppressed.

- District summaries were calculated using only the total number of students and average of the data that are presented. Suppressed student groups were not included in these calculations.

Report Definitions

<i>Ethnicity</i>	Ethnicity as reported by public school districts to TEA.
<i>Assessment Sections</i>	For each of the school districts and ethnicity indicators, data are provided for each of the following TSIA exam sections: Math Reading
<i>Measures</i>	For each of the assessment sections, the Coordinating Board provides the following descriptive statistics: N = Number of high school graduates who took the TSIA Average = Average TSIA section score for the high school graduates who took the TSIA and the subpopulations reported (race/ethnicity)
