### Agency Mission

The mission of the Texas Higher Education Coordinating Board (THECB) is to provide leadership and coordination for the Texas higher education system and to promote access, affordability, quality, success, and cost efficiency through *60x30TX*, resulting in a globally competitive workforce that positions Texas as an international leader.

### Agency Vision

The THECB will be recognized as an international leader in developing and implementing innovative higher education policy to accomplish our mission.

### Agency Philosophy

The THECB will promote access to and success in quality higher education across the state with the conviction that access and success without quality is mediocrity and that quality without access and success is unacceptable.

The Coordinating Board's core values are:

**Accountability:** We hold ourselves responsible for our actions and welcome every opportunity to educate stakeholders about our policies, decisions, and aspirations.

**Efficiency:** We accomplish our work using resources in the most effective manner.

**Collaboration:** We develop partnerships that result in student success and a highly qualified, globally competent workforce.

**Excellence:** We strive for preeminence in all our endeavors.

The Texas Higher Education Coordinating Board does not discriminate on the basis of race, color, national origin, gender, religion, age or disability in employment or the provision of services.

## Executive Summary

Section 61.0572 of the Texas Education Code requires that the Texas Higher Education Coordinating Board (THECB) collect information on the capital expenditure plans of public universities, health-related institutions, and state and technical colleges. This includes information on each institution's new construction, major repair and rehabilitation projects, and deferred maintenance needs.

For a number of years, many higher education institutions were required to submit their capital expenditure plans to both the THECB, in the form of the Master Plan (MP1), and to the Bond Review Board (BRB), in the form of the Capital Expenditure Plan. In response to the General Appropriations Act of the 77th Texas Legislature, this redundant reporting of institutional capital expenditure plans was eliminated. Institutions now report to the THECB, which in turn, shares the data with the BRB.

For the current report, institutions were required to submit capital projects greater than \$1 million planned for the Fiscal Year (FY) 2020 to FY 2024 reporting period. Because some of these projects start later in the reporting period, the financing of the project may continue into FY 2025 and beyond. *Therefore, this report refers to capital projects that will be undertaken during the FY 2020 to FY 2024 reporting period, although they may be financed in FY 2024 and beyond.*

The highlights of this report for FY 2020 to FY 2024 include plans for:

- 843 capital expenditure projects over the next five years for a total of \$23.4 billion
- 67.9 million gross square feet of space to be acquired, constructed, or renovated
- \$16.1 billion of new construction projects that will add more than 34.2 million gross square feet to facilities' inventories
- \$4.6 billion in major renovations for almost 30.5 million gross square feet
- 58 infrastructure projects at \$485 million
- 333 acres of property to be acquired at \$440 million; additional property acquisitions reported in new construction, infrastructure, and repair and renovation projects (adding an additional 117 acres)
- Six information resources projects at \$575 million
- \$2.4 billion in tuition revenue bonds accounting for 10.1 percent of total funding
- \$5.7 billion (24.6%) of projects funded with an "unknown or unspecified funding source" (see Table 1)
- \$697 million (3.0%) of total projects funded from the Higher Education Fund
- \$1,288 million (5.5%) of projects funded from the Permanent University Fund
- \$772 million (3.3%) of projects funded with auxiliary enterprise revenues
- Projects using \$904 million (3.9%) in gifts and donations

## **An Overview of Facilities in Texas Public Universities, Health-Related Institutions, and State and Technical Colleges**

The space requirement for institutions of higher education has increased with enrollments. As a result of decreasing state revenues per student, in 2003 the Legislature permitted higher education institutions to set a portion of undergraduate tuition rates, in part to address deficiencies in facilities' conditions. As enrollment growth continues, institutions must provide additional capacity on their campuses as well as address the needs of their existing facilities. They also must prioritize policies and practices that lead to increased efficiencies.

Given that the overarching 60x30 goal is essential to the future prosperity of Texas and for the state to compete globally, and that the state must increase the number of workers with credentials or degrees, Texas colleges and universities will require quality facilities, not only to attract and retain high-caliber students, but also to attract the world-class faculty necessary to teach them. Without bold action, Texas faces a future of diminished incomes, opportunities, and resources.

This report provides information about facilities at Texas public universities, health-related institutions, and state and technical colleges. Texas public community colleges are state-assisted institutions that must support their facilities from local funds or ad valorem tax funds, so their facilities do not require the THECB's review and are not included in this report.

A college or university campus consists of many different types of facilities. The composition of these facilities can be general, such as those that house classrooms, libraries, and offices. Other facilities may serve various research, agricultural, and athletic functions. Bookstores, student unions, cafeterias, and residence halls make up the ancillary buildings needed to support a better learning environment. In general, facilities are categorized as follows:

- General Purpose Buildings – classroom, laboratory, office and research buildings, and any other buildings related to the administration of these functions
- Auxiliary Services Buildings – student unions, infirmaries, bookstores, intercollegiate athletics buildings, parking garages, and similar self-funding facilities
- Physical Plant Buildings – power plants, maintenance facilities, and all buildings related to the physical plant
- Agricultural Services Buildings – facilities for housing livestock, barns, and silos
- Residence Facilities – dormitories, fraternity houses, apartments, and family housing
- Hospitals/Clinics – medical-related facilities
- Renovations – facilities that are temporarily taken out of service for major repair and renovation

## The Campus Master Planning Process

The Texas Education Code, Section 61.0572, gives the THECB responsibility for collecting planning information from institutions of higher education and using that information for evaluating campus construction and land acquisition projects.

Accordingly, Section 17.101(2) of the THECB's rules and regulations states that "Institutions of higher education shall submit current data to the Board for the following reports:

- (A) Facilities Development Plan (MP1). On or before July 1 of every year, beginning in 2004, an institution shall submit an update to its Facilities Development Plan (MP1) on file with the Board, as required by Texas Education Code, Section 61.0572(b) (4). In every even-numbered year, the Board shall provide Facilities Development Plan data to the Bond Review Board for inclusion in the Capital Expenditure Report. This report may include capital renewal and deferred maintenance projects. The report shall include:
  - (i) any proposed new construction greater than \$1,000,000, repair and rehabilitation greater than \$1,000,000, information resource project greater than \$1,000,000, and property purchases for any amount that may be submitted within the next five years to the Board, regardless of funding source;
  - (ii) the funding source for any planned project identified in paragraph 2(A) (i) of this section; and
  - (iii) a description of the proposals the institution plans to finance with the Higher Education Fund or Permanent University Fund."

In addition to the Facilities Development Plan (MP1), other reporting required of higher education institutions includes an annual Campus Condition Report, an annual submittal of the Campus Facilities Inventory, and an annual Project Status and Tracking Report.

Senate Bill 215 (83rd Texas Legislature, Regular Session) made sweeping changes to the THECB's role in capital projects. Specifically, the THECB no longer approves or disapproves capital projects; now the agency's role is to create standards and assess compliance in the areas of cost, efficiency, space need, and space use. In the event a project does not comply with the published standards, the THECB has the responsibility to notify legislative leaders, the Office of the Governor, as well as the governing board of the institution. **These notifications are generally made annually, at the conclusion of the calendar year.** In addition to reviews for compliance, the THECB will continue to conduct onsite campus facilities audits to verify the accuracy of the institutional facilities inventory and approved facilities development projects for each audited institution.

## Report Details for FY 2020 to FY 2024

This report summarizes the MP1 reports filed in July 2019 and covers planned capital projects for FY 2020 to FY 2024. Financial information for these projects was collected for the five-year reporting period of FY 2020 to FY 2024. Because some capital projects extend beyond the five-year reporting period, respondents were asked to include expenditures for FY 2025 and beyond as well.

This report summarizes planned construction projects, as reported by institutions, for the next five years. The included institutions have been encouraged to view this report as an instrument to assist them in their long-range facilities planning. The funding types and financing sources are not all-inclusive because future funding is uncertain. The MP1 thresholds are \$1 million for new construction, \$1 million for renovations, and property purchases that would cumulatively total \$1 million. In addition, the legislation requires information resource projects to be included if they cost more than \$1 million, even though THECB board consideration is not required. Before the consolidation of the THECB's report and the Bond Review Board's report, the MP1 data were collected in October each year. The Bond Review Board's reporting deadlines required the THECB to move its MP1 submission date to July 1.

For planning and reporting purposes, facilities-related projects are classified within the following project types:

**New Construction** – Construction of a new building on a site where no building previously existed or on a site on which a building has been demolished. Additions to existing buildings are a separate category and not considered new construction.

**Repair and Renovation (R&R)** – A project in which a portion of the building is renovated. The classic R&R project involves gutting an existing building and replacing electrical, plumbing, heating, ventilation, air-conditioning systems, and other major components.

**Additions** – Additions to existing buildings that will expand the available square footage of the structures

**Information Resources** – Purchase or installation of information technology resources on a campus, including networks, software, and telecommunications

**Infrastructure** – Construction of streets, sewers, electrical systems, steam tunnels, and other facilities necessary to operate the physical plant

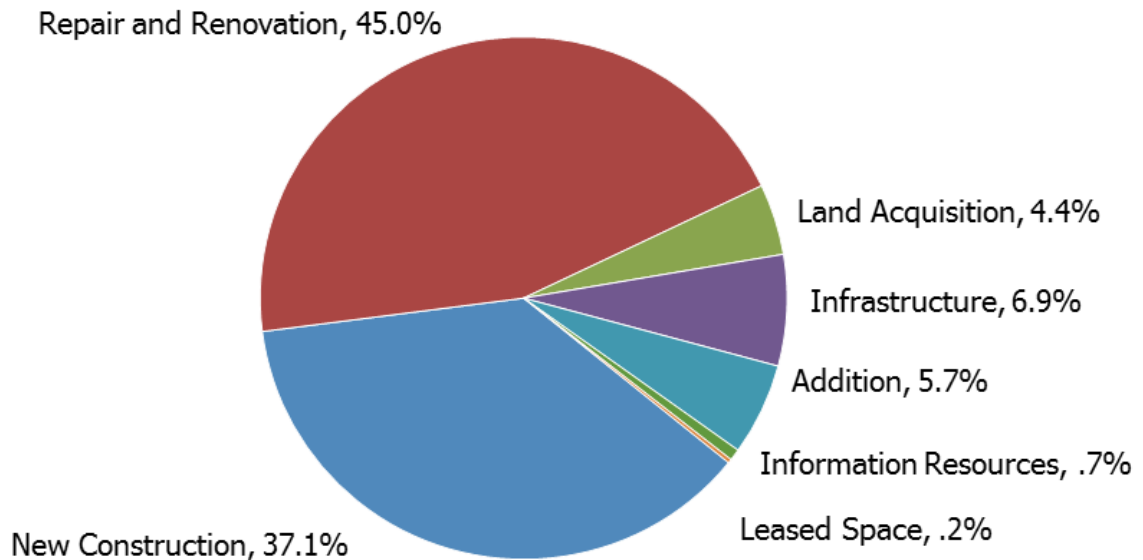

**Land Acquisition** – Purchase or acquisition of land, with or without a building structure

**Lease Space** – Expenditures to lease space from other entities, e.g., institutions typically lease space to provide space for new programs while permanent space is being constructed and to provide space for short-term projects for which permanent space is not cost-effective

## Capital Projects Planned FY 2020 to FY 2024

Institutions submitted 843 projects in their FY 2020 MP1 capital expenditure plans, down 3.4 percent from the 873 projects submitted for FY 2019 (Graph 1). Repair and Renovation projects represent the majority of all projects at 45.0 percent, with New Construction projects reporting second at 37.1 percent. Planned repair and renovation projects are down 4.5 percent from 397 projects in FY 2019 to 379 projects in FY 2020.

## Planned Expenditures by Project Type FY 2020 to FY 2024

The total cost of all projects submitted in the FY 2020 MP1 reports is more than \$23.4 billion, up \$1.6 billion from last year's \$21.8 billion (Graph 2). There are \$16.1 billion in new construction projects planned, representing 69.0 percent of the total cost. Planned repair and renovation projects increased from \$4.3 billion in FY 2019 to \$4.6 billion this year.

## Planned Space Acquisition FY 2020 to FY 2024

The institutions submitted 67.9 million gross square feet (GSF) to be constructed, purchased, or renovated in FY 2020 to FY 2024 (Graph 3). The submitted GSF decreased by 16.6 million, and the educational and general net assignable square feet (E&G NASF) decreased by 19.6 million from the previous reporting cycle.

The institutions plan to add 36.4 million GSF (53.6%) through new construction and addition projects, adding 10.5 million E&G NASF to current facility inventories. The institutions plan to repair and renovate 30.5 million GSF (44.8%), an increase of 3.3 million GSF 0.12% from the previous reporting cycle.

The institutions submitted 0.6 million GSF for land acquisitions in FY 2020, compared with 1.4 million GSF in FY 2019. Planned projects will provide institutions with an additional 450 acres of property. This remains the same as reported on the FY 2019 MP1 reports.

## Expenditures Planned for FY 2020 to FY 2024

Of the \$23.4 billion in planned expenditures, which includes FY 2024 and beyond, only \$19 billion (81.0%) is projected to be financed in the first five fiscal years (FY 2020 to FY 2024), leaving 19 percent of the financing projected for FY 2025 and beyond. This is a \$0.9 billion increase over the amount financed in the previous reporting period. Fiscal Year 2025 and beyond is not included in the graph but is included in the data chart. For this five-year period, FY 2022 accounted for the largest share at \$5 billion (21.3%) of the total expenditures.

## Projected Financing Types FY 2020 to FY 2025 and Beyond

The \$23.4 billion of the planned projects for the next five years and beyond will be financed using \$7.7 billion in revenue bonds, which accounts for 33.0 percent of the total (Graph 5). This is down \$0.2 billion from FY 2019's report of \$7.9 billion. More than \$6.2 billion of the projected costs have an unspecified financing type (26.4%). The "Other" category accounted for \$7.9 billion, which is an increase of \$2 billion as reported in FY 2019. This accounts for 34.0% percent of the total financing, in contrast to FY 2019's 27.1 percent.

## Funding Sources FY 2020 to FY 2024

The category of Unknown and Unspecified Funding Sources makes up the largest source of funds at \$5.7 billion (24.6%) and indicates institutions' uncertainty of how capital projects will be funded in the future (Table 1). Tuition Revenue Bonds represent \$2.4 billion (10.1%) in capital expenditures, a 5.9 percent increase over the previous reporting cycle.

## Appendix C – Definitions of Funding Sources for Construction Projects

**Available University Fund (AUF)** – The Available University Fund consists of total returns on all investment assets of the Permanent University Fund (PUF).

**Auxiliary Enterprise Funds** – Proceeds from enterprises that are operated by the institution, such as parking, food service, or clinics

**Energy Performance Contracting** – Funds available as the result of energy savings over a period of 20 years or less. These savings are realized through implementation of energy cost-reduction measures to conserve energy and save cost.

**Federal Grants** – Monetary grants received from various agencies of the federal government

**Gifts/Donations** – Donations or gifts received from private individuals, corporations, or other organizations

**Higher Education Fund** – Legislative appropriations earmarked for institutions not receiving Permanent University Fund monies

**Legislative Appropriations** – State government funds allocated by the Texas Legislature for use by various state entities and programs

**Other** – A source of funding that does not fit within any of the other categories listed

**Other Local Funds** – Proceeds from various sources within the institution or monies diverted from other line items within the institution's original budget

**Other Revenue Bonds** – Bond financing, authorized by an institution's board of regents, that can be repaid by proceeds from tuition, building use fees, or student use fees

**Private Development Funds** – Money from private sources that is used to privately develop a facilities project

**Permanent University Fund (PUF)** – The Permanent University Fund is a public endowment that provides financial support to most institutions in The University of Texas and Texas A&M University systems.

**Tuition Revenue Bonds** – Bonds authorized by the Texas Legislature for a specific capital improvement project, to be repaid by the institution by revenues from tuition. In past practice, the Legislature has approved reimbursement to the institutions for payments made to retire tuition revenue bonds by means of special line items as part of the general revenue appropriations.

**Unexpended Plant Funds** – Funding allocated for operation and maintenance of the physical plant but not utilized for that purpose

**60x30TX**
