718 Texas A&M University at Galveston

INTRODUCTION & SPECIAL PURPOSE MISSION

Texas A&M University at Galveston is pleased to present our narrative request for the 87th Session of the Texas Legislature. I will describe our institution, its special purpose and economic importance to the State of Texas, and our unique needs for the next biennium, which include much-needed infrastructure support to accommodate a larger training vessel for the Texas A&M Maritime Academy that will be docked on our campus beginning in 2023, followed by a new, National Security Multi-Mission Vessel (NSMV) shortly thereafter. Your support is critical, especially as we continue to respond to this unprecedented pandemic and plan our future strategy. We are well aware this will be a challenging legislative session, and we thank you in advance for your support.

Texas A&M-Galveston is a premier 21st century academic institution for maritime leadership and ocean and coastal studies on the Gulf Coast. We are a branch of Texas A&M University, established by the Legislature in 1962 for the special purpose of providing higher education for undergraduate and graduate instruction in marine and maritime studies in science, engineering, and business and for research and public service related to the general field of marine resources.

We share the mission of land-grant universities defined by a tradition of affordability, accessibility, and applying solutions for the needs of the state and the nation. At this campus, research, scholarship, and public service coalesce with student learning and success to benefit the economic strength of the State of Texas and the Nation. The proximity to the Gulf of Mexico, often referred to as our “window to the sea,” has enabled Texas A&M-Galveston to focus academic, research, and student opportunities into a unique marine and maritime experience that only Texas A&M-Galveston can offer.

TEXAS A&M MARITIME ACADEMY

Since its founding, the Texas A&M Maritime Academy remains one of only six state maritime academies in the United States and the only one located in the Gulf of Mexico. The mission of the Texas A&M Maritime Academy is to provide the U.S. with highly trained and qualified U.S. Coast Guard-licensed maritime professionals to support national security and waterborne commerce. The next closest maritime academy to the gulf is the New York Maritime Academy. Each year, more than 450 cadets are trained to become license officers in the United States Merchant Marine and ultimately make significant economic impacts to the Texas economy. There has been a dramatic increase in the demand for our students to support industry growth, innovation, and an aging maritime workforce.

Most Texas A&M Maritime Academy graduates become merchant mariners and sail on vessels in the domestic fleet, which includes over 40,000 self-propelled vessels, tugs and barges that move goods and supplies throughout the nation both along the coast and inland waterways. Texas ranks third in the United States with nearly 60,000 domestic maritime industry jobs, contributing over \$14 billion annually to the Texas economy. Without continued investment in this industry through education, our state and our nation become isolated in trade commerce.

Beyond the critical need of training for the next generation of licensed maritime professionals, our infrastructure request mentioned below will also help address the critical shortage of U.S. Merchant Mariners needed to crew commercial and government-owned sealift ships during a military crisis. Our graduates boost national security by supporting the U.S. military during times of war and national crisis, transporting supplies to U.S. troops, relief and war zones. Others choose to protect the nation as members of all branches of the military, including the U.S. Navy and U.S. Coast Guard.

In response to Hurricane Harvey in 2017, the United States Maritime Administration (MARAD), acting on behalf of the Federal Emergency Management Agency (FEMA), activated training ships from New York Maritime College, Massachusetts Maritime Academy and the Texas A&M Maritime Academy to support recovery operations. The ships from the New York and Massachusetts academies took over two weeks to travel to their mission destinations, delaying valuable recovery operations to severely-impacted areas. The Texas A&M Maritime Academy Ship, the General Rudder, was already in place, but only had the capacity to support 35 FEMA workers.

718 Texas A&M University at Galveston

As such, MARAD, with support from our Congressional Delegation, has worked to secure a larger training vessel that will be provided to the Texas A&M Maritime Academy in 2023, followed by a brand new state-of-the-art NSMV shortly thereafter. These training vessels serve as living laboratories, not just for our academy cadets, but for all Texas A&M-Galveston students. Further, the disaster response capabilities ensure the resiliency of both recovery efforts in a natural or man-made disaster and ensures the resiliency of the logistics supply chain critical to move goods statewide, nationally and internationally.

However, before we can accept either ship, significant infrastructure repairs must be made to our dock, in addition to other campus upgrades including a new central plant to support the larger vessel, related utility equipment, along with new underground thermal, electrical and data grids. Our dock has not seen any significant upgrades since 2009.

Your support of this request is critical to ensure we have an adequate vessel to train the next generation of merchant mariners, and to be able to provide the necessary support in times of national emergencies such as Hurricane Harvey.

THE BLUE ECONOMY

The blue economy is the sustainable use of ocean resources for economic growth, improved livelihoods and jobs, and ocean ecosystem health coalescing around two areas: power at sea and resilient coastal communities. The national blue economy has grown faster than the nation's economy as a whole. It is nearly impossible for any Texan to go a single day without eating, wearing or using products that come from or through the nation's coastal communities according to the National Oceanic and Atmospheric Administration.

As such, we are educating for the future with adaptive scholarship and academic programs that prepare our students to pursue careers in the marine and maritime industries and become leaders in their respective fields of passion; we are innovating for the future with impactful research and discovery that explores the broad impacts of humans and the environment along our coast and in our oceans to safeguard our planet's most valuable and underexplored resource – our oceans – that contributed over \$9 million in research expenditures in the past year; and we are supporting the nation's \$373 billion blue economy through integration of research and scholarship in our specialized fields with a steadfast commitment to serve the greater good near and far.

Texas is the nation's largest contributor to the country's GDP among all coastal states and contributes substantially to the blue economy through marine transportation, marine construction, tourism and recreation, and research on its living resources both on the coast and on inland waterways. Texas A&M-Galveston is supporting that effort by driving the blue economy in the Gulf Coast region through translational research and experiential learning in specific programs to develop leaders in these areas. We are fostering discovery and innovation through silo-busting multi-disciplinary research and studies that equate to tangible industry solutions, such by Texas A&M-Galveston engineering students who created a plasma device to reduce pollutants caused by ships burning marine fuel. This technology is currently being explored as a solution to meet reduced sulfur dioxide emissions under new international emissions guidelines.

We are a state and national leader in research, innovation, training and policy on successfully managing flood-prone landscapes and making that information freely available to the public. We worked to develop the Texas Coastal Atlas, which shows likely property damage to residential structures and associated flood depths for hurricane storm surge in the Houston-Galveston metro area, one of the state's most populous regions. Understanding, mitigating and solving flood problems in advance of and after the next major storm will be the most effective protection of Texas' residents and its economy.

Texas A&M-Galveston leads a multiyear research program, funded by the Gulf of Mexico Research Initiative, to investigate impacts of spilled oil and dispersants on the Gulf of Mexico ecosystems and public health. This work is significant to the state as oil releases occur almost daily along Texas' waterways, bays, bayous and estuaries

718 Texas A&M University at Galveston

that impacts the sustainability of these critical ecological and transportation systems.

In a similar consortium led by Texas A&M-Galveston, researchers are studying the role of natural and human factors on the fate of fisheries in the Gulf of Mexico and seek to understand the structure and resilience of stocks of important economic fish species (red snapper, tuna, and sail fish) in support of the food security of our nation.

All of our students are provided transformational learning opportunities. Texas A&M University was recently ranked by the Institute of International Education as the #1 public institution for sending students abroad for transformational learning experiences, preparing them for both Texas and global societies. Texas A&M-Galveston contributes to this mission with approximately 15% of its student body engaging in study abroad programs and can substantially increase the study abroad opportunities for students through investment in a training ship to accommodate additional students.

Our Maritime Academy's Summer Sea Term (between 70-80 days at sea) provides experiential training vital to licensing and success of our cadet graduates. The Academy has an essential presence in the nation's economic, political and naval strategy both through our cadets commissioned to naval or coast guard service, but also by serving as the "fourth arm of defense" as merchant mariners. That presence on the high seas depends on the graduates of the six state maritime academies and U.S. Maritime Academy. Our Electronic Technology Officer program is the first of its kind in the nation and will prepare our graduates to better serve and protect the critical maritime industry as it evolves toward more automation and remote operation.

These technical programs are supported by our Masters of Maritime Business Administration -- the number one program in the nation -- and undergraduate maritime business administration degree in providing uniquely-qualified business majors who help lead the maritime industry and global logistics in the 21st century. Our location on the Gulf Coast provides us access to valuable industry partners who aid in the preparation of our students today for the jobs of tomorrow through internships and summer training programs. This experience and preparation extends to our undergraduate researchers, one-third of whom are provided one-on-one mentorship, including freshman students who traditionally are unable to access research activities until their junior or senior semesters. In a survey of Texas A&M-Galveston graduates over the last 10 years: a majority were impacted by their participation in extracurricular experiences at Texas A&M-Galveston; over 80% belonged to a student organization; 49% completed an internship; and 35% worked with a faculty member on research.

Our graduates support a variety of the growing industries within the blue economy and are satisfied with their degrees. A survey of all alumni who graduated in the past five years reinforces Texas A&M-Galveston's effectiveness at preparing graduates for successful careers. Almost all Texas A&M-Galveston alumni surveyed were either employed (87%) or attending graduate school (8%), with ~80% of working alumni employed in a related field.

IMPACT OF COVID-19

Texas A&M-Galveston has experienced spring and summer revenue losses in tuition and fees as well as losses from refunding housing, meal plans and parking and losses from cancellation of all summer camps. Summer term losses are mainly due to occupancy downturn and a significant impact to over 230 cadets who did not receive required summer sea term training, which translates to longer time to graduation. Along with the six other state maritime academies, no large training ships were authorized to sail this summer. We project losses and expenses through FY 2020 to be about \$7.0 million across all funds. Possible new losses and/or expenses related to response to COVID-19 may be incurred in FY2021 as well. While some COVID-19 expenses have been mitigated by CARES Act funding, as we move toward planning for the spring semester we will most likely have additional costs to absorb. These will be directly related to our stringent safety measure and classroom delivery expenses we continue to need. Any new cost takes away from funding we have to support our students. Funding will shrink for initiatives such as student success and student affairs support.

Administrator's Statement

10/15/2020 10:29:08AM

87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

718 Texas A&M University at Galveston

Losses include:

\$2.7 million in Summer Sea Term loss;

\$1.4 million in housing refunds and an additional \$425,000 in lost revenue due to summer occupancy downturn;

\$519,000 in dining refunds and an additional \$282,000 from loss of dining commissions due to summer downturn;

\$350,000 in estimated tuition losses across all funds;

\$70,000 in parking refunds and an additional \$50,000 for loss of parking for summer occupancy;

\$200,000 in small vessel operations losses for Spring and Summer while fixed costs of employees and maintaining vessels continued;

\$1.0 million in Sea Camp losses due to cancellation of all camps while fixed costs of employees and camp software continued.

In spite of the challenges posed by the COVID-19 pandemic, we continue to achieve success in support of the blue economy and higher education in Texas. For example, this summer we safely sailed a training vessel to graduate 42 seniors with minimal graduation timeline impacts; recruited the largest incoming undergraduate (+5%) and graduate (+100%) classes for Fall 2020; maintained our first-year retention at the top level we achieved the year prior (81%); and graduated our largest-ever graduate class (54).

However, budget reductions, in addition to the unfunded mandate of the Hazlewood program (which costs Texas A&M- Galveston nearly \$1 million annually), continue to present difficult challenges that have serious ramifications for our students and our land-grant mission.

APPROACH TO 5% REDUCTION

We asked each of our units to determine priorities for all programs to address the 5% reduction. Based on these priorities we determined where we could cut program expenses by adding efficiencies such as combining administrative support for multiple programs. We have eliminated 5-6 vacant faculty positions and 3-4 vacant staff positions; instituted a hiring freeze coupled with a rigorous exception process. These measures will impact our ability to maintain our faculty/student ratio, maintain initiatives such as advising, writing and math labs and recruitment. Additionally student affairs initiatives will be impacted, limiting our ability in counseling and career services. Lastly, we have delayed or will not include any permanent merit consideration for our employees for FY2021.

TEXAS A&M UNIVERSITY AT GALVESTON'S LEGISLATIVE REQUESTS

New \$45,000,000 Capital Project Request: Special Purpose Institution Maritime Infrastructure needed to accept, house, and moor a larger vessel for the Texas A&M Maritime Academy

Texas A&M-Galveston recognizes the state's fiscal challenges and shares in those concerns. We must however, convey our urgent need to construct the infrastructure required to accept, house and moor a larger training vessel for the university and the students enrolled in the Texas A&M Maritime Academy licensing program. The timing of this request is necessary to meet the timeline for delivery of the larger vessel which is expected in 2023, followed by the NSMV shortly thereafter. Given the importance of this request for the Academy and our urgent need for it to be funded during this legislative session, we have provided three known and/or previously-used

718 Texas A&M University at Galveston

legislative remedies to fund this request, including authorization to issue debt through a TRB for \$45 million; debt service: \$3,923,306/Year of the Biennium or total of \$7,846,612; constituting an extraordinary circumstance and demonstrated need, issue debt service via a rider meeting constitutional requirements; or a one-time Special Line item for a Capital Project of \$45,000,000.

Summary of Project Need

The Texas A&M Maritime Academy has been forced to operate with limited ship resources since 2006 using a much smaller ship, the General Rudder. Using this smaller ship has caused delays in graduation for our cadets, limited our ability to recruit larger classes and has limited FEMA's ability to option the ship for disaster relief. In order to successfully train and educate the next workforce and compete with other maritime academies, and provide critical disaster relief assistance, we must be able to operate a larger vessel. This request will provide the following necessary and adequate infrastructure, including:

1. Shore-side Dock Infrastructure-\$5M: Existing dock utility connections and mooring is inadequate to support larger vessels, including a NSMV, making the acceptance of a new training ship impossible without infrastructure improvements. Funding will provide proper dock upgrades to accommodate the larger training vessel.
2. Campus Infrastructure-\$35M: The current plant and infrastructure, built in 1976, is aged and outdated. With higher levels of maintenance due to corrosive coastal conditions, capacity must be added and updated to provide adequate utilities for the new ship, as well as backup capacity for the entire campus and the ship's dock. Funding will provide a new central plant, related utility equipment, underground thermal, electrical and data grid.
3. State-of-the-art Classrooms and Labs for the Training Vessel-\$5M: As previously mentioned, with MARAD updating their fleet of ships at state maritime academies, a new NSMV will be delivered as a "shell," to the Texas A&M Maritime Academy and will require additional infrastructure to serve as a training vessel. Funding will provide communication and electronic navigation labs, gas turbine labs, diesel mechanical labs and multi-purpose classrooms.

Without these infrastructure upgrades this campus cannot accommodate the larger training vessel, which is necessary to train the number of students enrolled in our Academy programs. Texas A&M-Galveston will not be able to educate students for high-paying maritime jobs to meet Texas' and the nation's maritime industry needs for quality, professional and competent leaders in marine and maritime endeavors.

Restoration of 5% Cut

This reduction impacts teaching capacity, research capacity, our public service of testing Gulf of Mexico oyster populations and our ability to fund student support-related costs. Inability to hire faculty ultimately impacts four-year graduation rates, time-to-degree, and high-impact freshman experiences, which are particularly important for the success and retention of first generation and underrepresented students. A reduction in other staffing affects recruitment and pre-application assistance, academic advising and student success/retention, counseling, and career advising and placement. Reductions in our research-related items such as Coastal Zone Lab and Texas Institute of Oceanography limits our ability to leverage these funds for important grant opportunities as well as the impact to teaching both undergraduate and graduate students in our research labs. Lastly, these reductions impact the public service we provide by testing and distributing information to consumers about the health of our Gulf Coast oyster populations. Restoration of this funding is vital especially in light of COVID-19-related expenses we may have to fund.

TEXAS A&M SYSTEM FUNDING REQUESTS

We recognize the difficult financial situation and tough budget decisions that will face the 87th Legislature and will work collaboratively with state leaders to find the support needed for the education, research, and service we provide. A robust higher education sector is key to long-term economic growth and resiliency, but increased costs, revenue losses, and budget reductions due to the pandemic have Texas' higher education sector stressed and stretched. We request continued investment in higher education to maintain our service to the state.

Administrator's Statement

10/15/2020 10:29:08AM

87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

718 Texas A&M University at Galveston

Base Funding

Maintaining equitable, reliable, and predictable funding for higher education is critical for our institutions to plan, teach, and support students through to graduation and to pursue excellence. This base funding is provided by the State through both formula and non-formula support.

Formula funding accounts for 80% of our institutions' net GR appropriations and supports the core instructional, operational and infrastructure costs at our institutions. Our highest priority is maintaining the general revenue support to these formulas.

As higher education adapts to the financial hardships of COVID-19, non-formula items provide critical support for students and academic programs. We request that non-formula support items be maintained at FY2020-21 levels to preserve vital academic programs and student support services.

We request expansion of the Small Institution Supplement (SIS) to institutions up to 20,000 headcount. These institutions and their students' success are key to economic recovery and long-term resiliency. Expanding the SIS up to 20,000 students would provide critical support to help these institutions remain affordable for students and effective in fulfilling their missions.

Restoration of 5% Reductions

Across the A&M System the reductions total \$84.6 million. These reductions hurt. Our institutions had to cut into the teaching and services provided to our students that currently and will continue to impact students' success and time to degree. Continuing these reductions into the 2022-23 biennium will further harm our students.

Outcomes Based Funding

Any performance funding contemplated as part of state support for higher education should be in addition to formula funding, especially as institutions struggle with the economic fallout from the pandemic. While this session may not be optimal timing for a major funding initiative, we have worked across higher education on a proposal for increased student success at Texas' 27 regional institutions and can provide additional information as requested.

Higher Education Group Health Insurance

We request funding to cover increases in covered enrollments and in health care costs beyond our control. We also request restoration of the gap in funding for our employees compared to state employees in the ERS group plan.

Student Financial Aid

Increased support for student financial aid is vitally important to help students graduate with lower debt. We request increases to TEXAS grants and other financial aid programs be made in conjunction with funding the formula that provides the state's share of the costs of educating students.

Organizational Changes

Due to the recent retirement of Admiral Michael Rodriguez, Colonel Michael Fossum was named Superintendent of the Texas A&M Maritime Academy in addition to serving Vice President of Texas A&M University and Chief Operating Officer of Texas A&M University at Galveston.

Background Checks

Texas A&M-Galveston's statutory authority to conduct background checks on employees of the university comes from Texas Government Code Chapter 411 Subchapter (f) and Texas Education Code Section 51.215. It is our policy and practice to conduct such checks on all employees being considered for positions at Texas

A&M-Galveston.

SUMMARY

Texas A&M University at Galveston is a unique institution that offers a comprehensive and integrated approach to transformative education, innovation and discovery, and impact in the fields of marine studies and maritime affairs. Our graduates, staff and faculty are a vital resource for a state with 3,359 miles of coastline, the vast natural resources of the Gulf of Mexico, the second-largest petrochemical complex in the world, and home to six of the top ten ports for inbound and outbound tonnage in the United States.

The demand is now greater than ever for Texas A&M University at Galveston to prepare students to become leading professionals in these critical areas. Our graduates consistently enter into well-paying careers that utilize their highly sought-after skills which employers throughout the maritime economy have come to expect. Integral to our campus is the Texas A&M Maritime Academy. We have built the programs supporting this Academy for 50 years and invested over \$60 million dollars in capital improvements and renovations since 2010, all needed to support the Academy. Coupled with the approval of a larger vessel, we are positioned to compete with the other maritime academies nationwide. Our critical capital project request is the keystone to the success of our academy and its future.

------	-------------	----------	----------	----------	------------------------	------------------------

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, research enhancement, student services and institutional support. The funds are distributed on a weighted semester credit hour basis. The rate per weighted semester credit hour is established by the Legislature each biennium. The Teaching Experience Supplement formula provides an additional weight of 10 percent to lower and upper division semester credit hours taught by tenured and tenure-track faculty.

FULL TIME EQUIVALENT POSITIONS:		22.5	22.5	22.5	22.5	22.5

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Infrastructure Support formula distributes funding associated with plant-related formulas and utilities. This formula is driven by the predicted square feet for universities' educational and general activities produced by the Coordinating Board Space Projection Model. The portion of the formula related to utilities is adjusted to reflect differences in unit costs for purchased utilities, including electricity, natural gas, water and wastewater, and thermal energy.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

(1) - Formula funded strategies are not requested in 2022-23 because amounts are not determined by institutions.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The mission of the Coastal Zone Laboratory (CZL), which is associated with the laboratory of Oceanographic and Environmental Research, is to facilitate and coordinate technical know-how to University faculty, especially those in Marine Science Departments through laboratory instrumentation support, training and advising, which helps to foster scientific research in the Coastal Zone. The goals and objectives of the CZL are three-fold:

1. Provide scientific expertise of faculty and students to respond to important problems primarily facing the Texas Coastal Zone .
2. Educate and train students in addressing environmental problems.
3. Provide vital health, economic data and expertise on coastal problems to Texas Regulatory agencies.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Texas Comprehensive Research Fund provides funding to promote increased research capacity at eligible general academic teaching institutions including those other than The University of Texas at Austin, Texas A&M University, or any institution designated as an emerging research university under the Higher Education Coordinating Board's (THECB) accountability system.

Funding is to be expended for the support and maintenance of educational and general activities, including research and student services, that promote increased research capacity.

A legislatively determined amount of funding is allocated based on the average amount of restricted research funds expended by each institution per year for the three preceding state fiscal years as reported by the THECB.

Program Prioritization: Indicate the methodology or approach taken by the agency, court, or institution to determine the ranking of each program by priority.

Texas A&M University at Galveston prioritizes funds distributed through existing formulas as the highest priority as these formulas are needed to provide the necessary instruction and support services for our students. Existing tuition revenue bonds are needed to continue to pay the debt previously authorized for new facilities by the state. Non-formula items remain important for addressing specific needs beyond the formula, particularly in addressing unique institutional needs and/or providing an opportunity to leverage other resources, particularly federal funds. As part of the prioritization of existing funding sources, reinstating the 5% budget reduction helps maintain existing programs, and while reductions to the formulas is not specifically in our LAR, we ranked the reinstatement of the 5% reduction below our special line items primarily due to the importance of our number one legislative request for this session. New funding to address specific needs at Texas A&M University at Galveston was prioritized over the many activities due to the impact these new funds could have on advancing the institution.

Of particular importance is our priority items (5) which is our number one need for this session. It is a \$45,000,000 Capital Project Request entitled Special Purpose Institution Maritime Infrastructure needed to accept, house, and moor a newly authorized National Security Multi-Mission Vessel (NSMV) for Texas A&M University Maritime Academy. Texas A&M University at Galveston recognizes the state's fiscal challenges and share in those concerns. We must however, convey our urgent need to construct the infrastructure required to accept, house and moor a new training vessel for the University and the students enrolled in Texas A&M Maritime Academy licensing program. The timing of this request is necessary to meet the timeline for delivery of the vessel which is expected in by 2023. We therefore request your consideration be given during this session to any possible solution to fund this project. We have listed two options within ABEST 1) A one-time Exceptional Item request and 2) a TRB request.

4.A. Exceptional Item Request Schedule
87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

DATE: 10/15/2020

\$0

DESCRIPTION / JUSTIFICATION:

Texas A&M University at Galveston must construct the infrastructure required to accept, house and moor a new training vessel for the University and the students enrolled in the Texas A&M Maritime Academy licensing program. The timing of this request is necessary in order to meet the lead time required for construction before the delivery of the new training vessel, which is expected in 2023. The federal government provides the training ships each academy uses, which is central to conduct of our US Coast Guard-approved program, but the dock and shore-side support infrastructure is the responsibility of the state.

Our request will provide the following:

1. Proper dock upgrades - existing dock utility connections and mooring is inadequate to support larger vessels, including an NSMV, making the acceptance of a new training ship impossible without improvements.
2. Expanded plant capacity and back up capacity - current plant and infrastructure, built in 1976, is aged and outdated, with high levels of maintenance due to corrosive coastal conditions.
3. State-of-the-art classrooms and labs - The NSMV will be delivered as a "shell," and require additional infrastructure to serve as a training vessel such as communication and electronic navigation labs, gas turbine labs, diesel mechanical labs & multi-purpose classrooms.

EXTERNAL/INTERNAL FACTORS:

Major accomplishments to date and expected over the next two years:

The Texas A&M Maritime Academy was established by the Texas Legislature and the Board of Regents of Texas A&M in 1962. There are only six state maritime academies in the nation, and we are the only one in the Gulf of Mexico region. Recent successful efforts by the U.S. Maritime Administration (MARAD), supported by the Texas Congressional Delegation, have resulted in approval of congressional funding for a new National Security Multi-Mission Vessel (NSMV) for the Texas A&M Maritime

4.A. Exceptional Item Request Schedule
87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

DATE: 10/15/2020
TIME: 10:29:24AM

Agency code: 718

Agency name:

Texas A&M University at Galveston

CODE	DESCRIPTION	Excp 2022	Excp 2023
------	-------------	-----------	-----------

Academy expected to be delivered in 2023. This vessel will not only serve as a training platform for our students but will be equipped to respond to national security concerns such as natural disasters like Hurricanes Katrina, Ike and Laura. Most Texas A&M Maritime Academy graduates become merchant mariners and sail on vessels in the domestic fleet that moves goods and supplies throughout the nation both along the coast and inland waterways. Texas ranks third in the United States with nearly 60,000 domestic maritime industry jobs, contributing over \$14 billion annually to the Texas economy. We expect to complete the facility within the next two years if we receive the funding needed.

Year established and funding source prior to receiving non-formula support funding: n/a

Formula funding: none

Non-general revenue sources of funding: none

Consequences of not funding:

Without these infrastructure upgrades, this campus cannot accommodate the larger training vessel, which is necessary to train the number of students enrolled in our Academy programs. Texas A&M at Galveston will not be able to educate students for high-paying maritime jobs to meet Texas' and the nation's maritime industry needs for quality, professional and competent leaders in marine and maritime endeavors. The Gulf will be without a vessel to support rescue and recovery after natural disasters.

PCLS TRACKING KEY:

APPROXIMATE PERCENTAGE OF EXCEPTIONAL ITEM : 100.00%

CONTRACT DESCRIPTION :

Most likely several contracts for building and construction of infrastructure for utilities, dock improvements and outfitting and equipping training vessel.

CODE	DESCRIPTION	Excp 2022	Excp 2023
-------------	--------------------	------------------	------------------

Consequences of not funding: This reduction impacts teaching capacity, research capacity, our public service of testing Gulf of Mexico oyster populations and our ability to fund student support initiatives. Inability to hire faculty ultimately impacts four-year graduation rates, time-to-degree, and high impact freshman experiences, which are particularly important for the success and retention of first generation and underrepresented students. A reduction in other staffing affects recruitment and pre-application assistance, academic advising and student success/retention, counseling, and career advising and placement. Reductions in our research related items such as Coastal Zone Lab and Texas Institute of Oceanography limits our ability to leverage these funds for important grant opportunities as well as the impact to teaching both undergraduate and graduate students in our research labs. Lastly, these reductions impact the public service we provide by testing and distributing information to consumers about the health of our Gulf coast oyster populations. These budget reductions, in addition to the unfunded mandate of the Hazlewood program (which costs Texas A&M-Galveston over \$1 million dollars annually), continue to present difficult challenges for Texas A&M at Galveston in achieving excellence in education and research for our students and the State of Texas.

B. Assessment of Fiscal Year - Efforts to Meet HUB Procurement Goals

Attainment:

Agency 718 exceeded statewide Professional Services goals in FY18 with strong support again in FY19.

Applicability:

Generally, Heavy Construction is not a procurement category applicable to this agency's operations. FY18 report corrected an assigned expenditure in the category from an FY17 report.

Agency 718 noted no expenditures in FY19 for Building Construction while improving in Special Trade in FY 19 over FY18. All other categories applicable.

Factors Affecting Attainment:

718 is an island campus with academic and research focus devoted to marine and maritime industries, purchases in support of academic and research initiatives pose challenges to identifying HUB suppliers.

"Good-Faith" Efforts:

Agency 718 made the following good faith efforts to comply with statewide HUB procurement goals in FY 2018-2019:

Agency 718 HUB initiative is coordinated by the HUB program of Texas A&M University Main Campus (711) so similar initiatives apply:

* Agency 718 collaborated with other TAMUS members to host an annual HUB vendor event where department level purchasers and HUB vendors can meet and align services with university purchasing needs and,

* systematically deployed pre-bid/proposal meetings that ensured information dissemination that reflected the university's procurement and HUB requirements.

* Agency 718 worked closely with our outsourcing partner to increase the opportunities and utilization of HUB suppliers through increased subcontracting opportunities including hosting an annual HUB construction expo where prime contractors and HUB subcontractors have an opportunity for face to face meetings and

Time: **10:29:24AM**

Agency Code: **718** Agency: **Texas A&M University at Galveston**

for HUB to learn about upcoming bid opportunities.

While participating in the above noted System HUB vendor show annually on the main campus, Agency 718 hosts separate on-campus HUB vendor show to increase awareness of geographically proximate HUB vendors.

USE OF HOMELAND SECURITY FUNDS

Expenses not falling under CARES Act funding are currently funded by designated funds until possible FEMA reimbursements are processed. Institutional CARES Act funding has been utilized to properly equip classrooms and other spaces with on-line equipment, cameras and other necessary items for teaching, to provide and install plexiglas shields for each classroom and other open administrative spaces, to provide enhanced cleaning and disinfecting, to provide signage relating to masks and health protocols, and to install plexiglas shields for staff who may have high exposure. All classes including summer were converted to online classes. Student CARES Act funding is used to support student expenses related to attendance. Fall classes are a combination of online and face-to-face. Residence hall rooms are available for students needing isolation. All staff continue to remain as much as possible in their offices and are required to wear face masks outside of the office. Dining services provides both dine-in at proper social distancing and take out. We utilize a self-reporting tool for anyone feeling ill or who have had possible exposure so they can be tested. Tests are performed on campus and available to students, faculty and staff when proper forms are submitted. TAMUG continues to be engaged every day at every level of leadership with our counterparts at the main campus. All decisions are made through a collective review and discussion from our leadership.

Requested in Prior Session?	Value of Existing Capital Projects	2022-23 Estimated Debt Service (If Applicable)	Debt Service MOF Code #	Debt Service MOF Requeste
1		Construction of Buildings and Facilities				Special Purpose Institution Maritime Infrastructure to provide necessary and adequate infrastructure to receive and support new \$325 million National Security Mutli-mission Vessel (NSMV) - Texas A&M University at Galveston must construct the infrastructure required to accept, house and moor a new training vessel for the University and the students enrolled in the Texas A&M Maritime Academy licensing program. The timing of this request is necessary in order to meet the lead time required for construction before the delivery of the new training vessel, which is expected in 2023. The federal government provides the training ships each academy uses, which is central to conduct of our US Coast Guard-approved program, but the dock and shore-side support infrastructure is the responsibility of the state. Our request will provide the following: 1.Proper dock upgrades - existing dock utility connections and mooring is inadequate to support larger vessels, including an NSMV, making the acceptance of a new training ship impossible without improvements. 2. Expanded plant capacity and back up capacity - current plant and infrastructure, built in 1976, is aged and outdated, with high levels of maintenance due to corrosive coastal conditions. 3. State-of-the-art classrooms and labs - The NSMV will be delivered as a "shell," and require additional infrastructure to serve as a training vessel such as communication and electronic navigation labs, gas turbine labs, diesel mechanical labs & multi-purpose classrooms. Project Description

Special Purpose Institution Maritime Infrastructure to provide necessary and adequate infrastructure to receive and support new \$325 million National Security Mutli-mission Vessel (NSMV) - Texas A&M University at Galveston must construct the infrastructure required to accept, house and moor a new training vessel for the University and the students enrolled in the Texas A&M Maritime Academy licensing program. The timing of this request is necessary in order to meet the lead time required for construction before the delivery of the new training vessel, which is expected in 2023. The federal government provides the training ships each academy uses, which is central to conduct of our US Coast Guard-approved program, but the dock and shore-side support infrastructure is the responsibility of the state.

Schedule 8C: Tuition Revenue Bonds Request by Project

Agency Code: **718**

Agency Name: **Texas A&M University @ Galveston**

Project Name	Authorization Year	Estimated Final Payment Date	Requested Amount 2022	Requested Amount 2023
Engineering Building	2001	5/15/2022	\$ 756,000.00	\$ -

718 Texas A&M University at Galveston

Capital Project-Special Purpose Institution Maritime Infrastructure

(1) Year Non-Formula Support Item First Funded: 2021
Year Non-Formula Support Item Established: 2021
Original Appropriation: \$45,000,000

(2) Mission:

Texas A&M University at Galveston must construct the infrastructure required to accept, house and moor a new training vessel for the University and the students enrolled in the Texas A&M Maritime Academy licensing program. The timing of this request is necessary to meet the construction lead time for delivery of the new training vessel, which is expected in 2023. The federal government provides the training ships each academy uses, which is central to conduct of our US Coast Guard-approved program, but the dock and shore-side support infrastructure is the responsibility of the state.

(3) (a) Major Accomplishments to Date:

The Texas A&M Maritime Academy was established by the Texas Legislature and the Board of Regents of Texas A&M in 1962. There are only six state maritime academies in the nation, and we are the only one in the Gulf of Mexico region. Recent successful efforts by the U.S. Maritime Administration (MARAD), supported by the Texas Congressional Delegation, have resulted in approval of congressional funding for a new National Security Multi-Mission Vessel (NSMV) for the Texas A&M Maritime Academy to be delivered before 2024. This Vessel will not only serve as a training platform for our students but will be equipped to respond to national security concerns such as natural disasters like Hurricanes Katrina, Ike and Laura.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

We will be able to train our current license option population of over 450 cadets each year with the ability to grow instead of limiting the number we can currently train aboard the General Rudder (50 cadets).

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

None

(5) Formula Funding:

N/A

(6) Category:

Instructional Support

(7) Transitional Funding:

N

718 Texas A&M University at Galveston

(8) Non-General Revenue Sources of Funding:

None

(9) Impact of Not Funding:

Without these infrastructure upgrades, this campus cannot accommodate the larger training vessel, which is necessary to train the number of students enrolled in our Academy programs. Texas A&M at Galveston will not be able to educate students for high-paying maritime jobs to meet Texas' and the nation's maritime industry needs for quality, professional and competent leaders in marine and maritime endeavors. The Gulf will be without a vessel to support rescue and recovery after natural disasters.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuation:

This request is for a one-time funding source for a Capital Project. We have also requested a possible authorization to issue Tuition Revenue Bonds to fund this project with general revenue to support the debt service. This request is one of the possible two options we have submitted. Your expertise is needed to determine any other possible funding solutions.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

Successful completion of construction before delivery of new vessel.

(13) Performance Reviews:

Annual enrollment goals for growth of the maritime academy will be established within the next year in order to compete successfully with the other maritime academies in the U.S.

718 Texas A&M University at Galveston

Coastal Zone Laboratory

(1) Year Non-Formula Support Item First Funded: 1973
Year Non-Formula Support Item Established: 1973
Original Appropriation: \$40,000

(2) Mission:

The mission of the Coastal Zone Laboratory (CZL), which is associated with the laboratory of Oceanographic and Environmental Research, is to facilitate and coordinate technical know-how to University faculty, especially those in Marine Science Departments through laboratory instrumentation support, training and advising, which helps to foster scientific research in the Coastal Zone. The goals and objectives of the CZL are three-fold:

1. Provide scientific expertise of faculty and students to respond to important problems primarily facing the Texas Coastal Zone.
2. Educate and train students in addressing environmental problems.
3. Provide vital health, economic data and expertise on coastal problems to Texas Regulatory agencies.

(3) (a) Major Accomplishments to Date:

This funding has trained graduate and undergraduate students to conduct research in numerous projects relevant to the State of Texas and the nation. These students pursue higher degrees and employment.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

The original mission of CZL was to manage and coordinate research, advisory and public service functions initiated by the faculty of Texas A&M University at Galveston. Due to continued reduction in funding over the years coupled with the changing needs of modern Texas, the focus of CZL is changing to research, teaching, and public service related to the contamination of the marine environment. The funds are now used in conjunction with other research funds to accomplish these new goals.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

None

(5) Formula Funding:

N/A

(6) Category:

Research Support

(7) Transitional Funding:

N

718 Texas A&M University at Galveston

(8) Non-General Revenue Sources of Funding:

None

(9) Impact of Not Funding:

Reductions have already resulted in loss of educational and training opportunities for many graduate and undergraduate students. This is the only laboratory specializing in the fate of trace metals and toxic contaminants in Texas waters which effect consumable seafood. Funding is needed on a permanent basis, including at minimum the restoration of the current 5% reductions as well as restoration to original funding levels as feasible.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuation:

Permanent

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

Measures are already established and used to determine efficient use of state funding through number of peer-review articles published and number of grants leveraged.

718 Texas A&M University at Galveston

Institutional Enhancement(Academic and Student Support)

(1) Year Non-Formula Support Item First Funded:	2000
Year Non-Formula Support Item Established:	2000
Original Appropriation:	\$1,000,376

(2) Mission:

The mission of the instructional enhancement non-formula item is to support Texas A&M University at Galveston's (TAMUG) base funding for core academic and student support operations. This funding enables Texas A&M at Galveston to seek levels of programs and academic excellence beyond that which is provided by our basic formula funding. Texas A&M at Galveston uses these funds to support faculty salaries for teaching and advising.

(3) (a) Major Accomplishments to Date:

Since receiving institutional enhancements funds in 2000, TAMUG enrollment has increased from 1,288 to approximately 2,100 TAMUG students which includes TAMU enrolled engineers of approximately 450. TAMUG has experienced the largest increase in degrees awarded in the state from 2015 to 2019 at 13% and for economically disadvantaged students at 25%. The 6-year graduation rate has increased by 15% from 2015 to 2019 versus the state average of 2%.

A recent survey of TAMUG alumni showed the following: 1) 9 of every 10 graduates were employed within 2 years of graduation; 2) 76% are employed in a field related to their degree; 3) 84% said education prepared them for continued personal and professional growth; 4) Over half are hired into their first position at a salary of more than \$50,000/year.

TAMUG also continues to develop new degree programs in response to the demands of industry. New programs include a Ph.D. in Marine and Coastal Management and Science, a Bachelors of Science in University Studies with concentrations in Maritime Communication and Public Policy, and a Tourism and Coastal Community Development degree. Our graduates will soon fill this direct need identified by industry. Finally, a certificate in Geographical Information Systems will be offered (in collaboration with Texas A&M University Geosciences and Agriculture and Life Sciences).

(3) (b) Major Accomplishments Expected During the Next 2 Years:

We will seek out ways to expand our programs and new degree offerings in order to respond to the demands of the industry. We will also continue to expand academic partnerships with the TAMU campus in College Station, similar to the engineering student expansion on the Galveston campus. Additionally, we will seek out ways to expand our curriculum within the special purpose mission of the University through surveying industry partners, collaborating and creating partnerships with Texas A&M University, and reviewing programs for quality improvement.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

The Institutional Enhancement special item was the result of the consolidation of certain types of special items by the 76th Leg., plus the addition of an initial \$1M per year for academic enhancement purposes.

(5) Formula Funding:

N/A

718 Texas A&M University at Galveston

(6) Category:

Institutional Enhancement

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

None

(9) Impact of Not Funding:

Institutional Enhancement funding is especially important to small institutions such as Texas A&M at Galveston (TAMUG). This funding supports basic academic and student support needs of the university. Folding this funding into the formula would harm TAMUG as it would redistribute this funding at a smaller amount to the smaller institutions. Any reduction of this funding would require reduction in teaching salaries, increase in class size, possible elimination of some course offerings and academic support services as well as the inability to expand our special purpose mission. Restoration of the currently planned 5% reduction is especially important in maintaining this basic support.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

This funding is needed on a permanent basis as a reduction would greatly impact our ability to educate our students.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

Measures are already established and used to determine retention and graduation rates, program effectiveness, degrees awarded and alumni success and satisfaction as noted above.

718 Texas A&M University at Galveston

Texas Institute of Oceanography

(1) Year Non-Formula Support Item First Funded: 1989

Year Non-Formula Support Item Established: 1989

Original Appropriation: \$1,300,000

(2) Mission:

The mission of the Texas Institute of Oceanography (TIO) is to provide focus for research of the Gulf of Mexico coast, to manage and coordinate the academic marine research programs of the state of Texas, to assure scientists of Texas universities of suitable multi-user facilities, to manage federal programs, and to provide the research and technological base for the development of marine based businesses in the state of Texas and Gulf of Mexico. This line item also includes our Seafood Safety Lab whose mission is to test and assure oyster consumers in the State of Texas that oysters from the Gulf are safe to eat.

(3) (a) Major Accomplishments to Date:

TIO has maintained a leverage ratio of external funding over 11:1, generating over \$40 million. TIO submitted more than 720 proposals to federal, state and other support agencies to support its mission. TIO has generated important positive impacts for the scientific understanding of the coast of Texas, supporting efforts in topics such as biodiversity, pollution and coastal zone management, helping not only scientists, but also resource administrators and regulators in their efforts to manage the Gulf of Mexico and the Texas Coast. TIO funding has been invaluable in the rapid response to natural and man-made events, such as hurricanes and oil spills. TIO also supports research in the maritime business sector, including development in maritime cybersecurity and optimization of port operations. Lastly, TIO supports the high level training of more than 100 graduate and undergraduate students, in addition to postdoctoral research scientists and visiting scientists conducting studies and increasing the scientific understanding of the area.

Our Seafood Safety Lab monitors the levels of *Vibrio vulnificus* and *Vibrio parahaemolyticus* in Galveston Bay oysters. This data is provided to the Texas Department of State Health services, so that they may temporarily restrict oyster harvesting from areas of the Bay that may have high bacterial counts, in order to reduce potential *Vibrio* infections in oyster consumers.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

TIO is an important key for the growth plan of the University during upcoming years, providing funds to attract world-class researchers that will increase marine investigation in Texas and continue working towards the mission of the Institute. The University plans include the hiring of at least 15 new faculty in upcoming years, the generation of new areas of research, the support of approximately 50 students and young researchers, and the leverage of new multi-million research grants and seafood safety testing.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

None

(5) Formula Funding:

N/A

718 Texas A&M University at Galveston

(6) Category:

Research Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Local oystermen pay fees to support the oyster testing done in the Seafood Safety Lab and these funds are collected in fund 5022 and should continue to support this testing.

(9) Impact of Not Funding:

For over 20 years, TIO has been a key element in the research of the coast of Texas. The impact of TIO funding has been demonstrated to go well beyond funds allocated, helping to generate extramural funding several times the value of its annual budget, thus multiplying its impacts. In previous years, cuts in funding have limited our research capabilities. Not funding this initiative means that Texas A&M University at Galveston would be unable to continue meeting the legislative-mandated maritime and marine research mission as stated during its creation. Furthermore, not funding will create loss of opportunities for faculty, research staff, and undergraduate and graduate students to contribute to the study of the coast of Texas and its consequence for not providing the best possible information to resource administrators, business leaders, and policymakers in their decisions. TIO has also demonstrated to be an important element during disaster evaluation and recovery; lack of funding will decrease the rapid response capabilities to assess the impact after natural of human disasters, affecting the availability of data for responders and managers. Restoration of the current 5% reduction is vital in maintaining current activities with the goal of restoring funding to its original appropriation as feasible. A decrease in funding for Oyster results in fewer oyster samples tested which ultimately puts our oyster consumers at risk.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

This funding is needed on a permanent basis, so the University can continue generating the positive results that has positioned it as the most important marine-focused University on the Gulf of Mexico, a source of pride to Texans.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

Performance is measured in number of proposals submitted, number granted, number of undergraduate, graduate and postdoctoral students conducting studies made available through this funding.
