760 Texas A&M University - Corpus Christi

Texas A&M University-Corpus Christi (A&M-CC) is a vital educational and economic force in South Texas. A&M-CC is a 4-year public university with an enrollment of approximately 10,800 students (56% minority) representing over 183 Texas counties, 48 states and 52 countries. From FY02 to FY21, the number of degrees awarded increased 111%, with more than half of the graduates being first-generation college students, graduating from programs designed to meet the employment needs of the region and state. As an R2 doctoral-granting institution with high research activity, the Island University helps to support the economic development of the region, as well as the sustainability of the Gulf of Mexico, while providing students with hands-on learning opportunities. As both a Hispanic Serving and multicultural institution, the Island University has a long record of success in closing the gaps in educational attainment.

Our commitment to educational excellence is underscored by the national recognitions earned by A&M-CC. Key accomplishments include:

- 1 of only 8 schools in Texas recognized on the 2021 Phi Theta Kappa Transfer Honor Roll as a four-year that has developed dynamic transfer pathways that lead to excellence and success among community college transfer students.
- Named a Yellow Ribbon Program school for support to veterans by the US Department of Veterans Affairs
- Honored by Southland Conference with the 2021-22 Academic Performance Award
- Top 10 Bachelor's degrees in Environmental Science in the US (by study.com for 2022)
- Department of Counseling 7 Educational Psychology awarded Outstanding Master' Program by Southern Association of Counselor Education and Supervision out of 2000 other programs
- Top 10 Best MBA programs in Texas for 2021 (by College Consensus)
- College of Business holds two AACSB accreditations, achieved by less than 1% of Business Colleges in the world
- Top 10 Graphic Design Programs in Texas on the Art Career Project's 2022 Best Schools
- Over 10,000 hours of volunteer service from nursing students in 2021
- 2022 Organizational Award from the City of Corpus Christi Landmark Commission

Key recognitions related to online learning include:

- Listed in top 20 Texas most affordable online programs by Online Colleges for 2021-22
- Nationally recognized as one of the only 40 Tier 1 Colleges, out of 1,200 public and private universities reviewed, by higher education nonprofit Educate to Career (ETC) in its 2020 College Rankings
- Ranked in Top 20 Best Accredited Online Colleges in Texas (by Learn.org)

A&M-CC offers bachelor's, master's, and doctoral degrees in six colleges: Business, Education and Human Development, Liberal Arts, Nursing and Health Sciences, Science, and Engineering. With a student to faculty ratio of 21:1, A&M-CC is one of the largest employers in the Coastal Bend and, as a result, has a major impact on the economies of Corpus Christi, South Texas, and the State of Texas by multiplying tax revenue generated and sustaining a well-prepared workforce. A&M-CC's annual economic impact on the Coastal Bend is more than \$595M, which generates over 10,399 full-time equivalent jobs. The benefit of A&M-CC to the Texas economy is estimated at \$942M per year.

A&M-CC is proud to be a good steward of our fiscal resources. To continue successfully serving our students, particularly those who are at risk or from underrepresented populations, the university must maintain all current efforts, in addition to new initiatives, to support student learning post-COVID. Given the change in K-12 educational opportunities during the pandemic, student support is needed as never before at the university level. For example, we saw a 35.4% increase from FY21 to FY22 in the number of students utilizing our mental health services, so increased staffing is critical to meet students' needs.

Administrator's Statement

10/18/2022 9:10:21AM

88th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

760 Texas A&M University - Corpus Christi

Additionally, the university must build upon recent successful increases in retention rates and the number of graduating students. Some examples of programs that have led to these successes include Student Success Initiatives, our Viking to Islander Program partnership with our community college, and our services for veterans.

- Student Success Initiatives: During the last academic year, 90.5% of our First Time In College (FTIC) and 30.3% of all students received services from the Center for Academic Student Achievement, which includes academic support (tutoring and writing center), academic coaching, and special programs (First Islanders Scholars Academy, TRiO Programs, and Island Harbor). Additionally, the university expanded our Open Access Resources program to promote access to free online digital information, reducing textbook costs.
- Viking to Islander Program (VIP): VIP helps ensure over 450 students have a seamless transition from Del Mar College, our community college partner, to A&M-CC.
- Veteran Services: The Office of Veterans Services assisted more than 1,600 veterans, active duty servicemembers, and dependents of veterans through the enrollment process, an increase of 23% over the last biennium. The office also provides community building events, a specially tailored veterans' orientation, financial aid and career workshops, and our annual Veterans Week celebration.
- Through our innovative Finish in Four initiative, A&M-CC encourages our students to complete their degree on time. This initiative is a partnership between the student and the institution, with the university commitment to assist students in completion of their degrees in four years. The many benefits of the program include savings on tuition and fees, reduced student loan debt, avoidance of unnecessary excess credit hours, and, for Texas residents, a \$1,000 tuition rebate after graduation. Further, this results in students entering the workforce more quickly, enhancing the state's economic productivity. This initiative has led to a 7% increase in the number of incoming freshmen enrolling in 15 credits in their first term, assisting students with early momentum and staying on track for a four-year degree completion.

Building a Talent Strong Texas

Consistent with the Texas Higher Education Coordinating Board's (THECB) Building a Talent Strong Texas, A&M-CC has increased its minority enrollment. Hispanic enrollment increased 86.5% from 2002 to 2021. A&M-CC is one of the most ethnically diverse institutions of higher education in Texas with a student body 47.9% Hispanic, 36.6% Anglo, 4.9% African-American, 7.6% other minorities and/or multi-racial, and 3.0% international.

A&M-CC's strategic plan targets enrollment growth and increasing educational attainment in historically underserved areas of South Texas. Non-formula Institutional Enhancement funding, originally the South Texas Border Initiative, is tied to population demographics and unmet education attainment with the goal of improving the social and economic outlook of those typically underserved populations.

More than 89% of A&M-CC's undergraduate and graduate students receive some form of financial assistance including CARES funding. Fifty percent of our students are first generation college students, and of the 2,768 degrees we awarded in FY21, 52.8% went to first generation college students. To ensure closure of educational attainment gaps, A&M-CC has a successful track record of administering grant-funded programs that benefit underserved, disadvantaged and minority students. A&M-CC has committed to ensuring degree opportunities are accessible and affordable for minority and at-risk students. In FY21, 53.3% of our degrees awarded went to minority students. THECB statistics also indicate that over 57.9% of A&M-CC's bachelor's degrees are awarded to "at risk" students. A&M-CC surpasses other target thresholds. During FY21, A&M-CC awarded 490 degrees in STEM fields and the average starting salary of our graduates has increased steadily.

Exceptional Item Requests

Coastal Aquaculture for the Texas Economy - \$4M for the 2024-25 biennium

Texas stands alone among gulf states as the only state lacking a developed commercial aquaculture in our coastal waters. Texas has lost 80% of our oyster reefs due to a variety of factors including overfishing, pollution, and hurricane damage. The 86th Texas Legislature passed HB 1300, allowing for growth of cultivated oysters in Texas to

760 Texas A&M University - Corpus Christi

boost economic prosperity along the Gulf Coast. The private sector has shown high interest in this industry, with \$7.2M approved for a commercial hatchery and an addition \$6.6M approved for an aquaculture training center.

This funding request is \$4M for the biennium. In addition to the 2,000 new jobs created from this project, the post-processing oyster economic value to the state is over \$100M. It will also add a skilled workforce, ready to expedite development of this exciting new industry. As a state leader in aquaculture, and home to the Harte Research Institute and the Oyster Resource and Recovery Center, A&M-CC is uniquely equipped to help launch aquaculture in Texas. Through our existing local partnerships, we can facilitate the planned construction of a large-scale oyster hatchery for production of both oyster larvae and seed oysters; these partnerships will also support the commercial oyster farming industry and coastal reef restoration efforts. The university and our partners will also support the commercial oyster farming industry and coastal reef restoration efforts.

If this program goes unfunded, Texas can expect a continued decline in oyster yields, which are already at 50% of their average. This results in a decrease to the current \$70M that oysters bring in state revenue. Other negative impacts include increased pressure on Texas' \$1B sport fishing industry (due to continued reef destruction), increased importation of oysters from other states, and a continued decline in ecosystem services provided by oysters (approximately \$60,000 per acre of oysters per biennium).

National Spill Control School Expansion - \$2.6M for the 2024-25 biennium

The A&M-CC National Spill Control School (NSCS) was established in 1977 and serves as a consulting, training, and research resource for the National Response Team created by the US Oil Pollution Act of 1990. Expansion of the NSCS will increase the number of personnel (currently one employee) and courses offered in response to increased Texas oil exports, a wise investment by and for Texas to protect the coastline, beaches, and vital infrastructure. Given recent rapid growth in the production and transportation of oil and natural gas up and down the coast, there is increased need for additional resources for state agencies, students, and workers in the Emergency Management and energy industries to offer specialized nearshore and offshore oil and hazardous material response training that does not currently exist related to spill prevention, planning, and response. With this funding, NSCS will support essential and mandatory training to state agencies at a reduced or no-fee rate, as well as enable them to serve as a spill advisor to those agencies, port industries, and ports, including the Port of Corpus Christi Authority (POCCA).

Texas depends on offshore exploration and coastal terminals as a major economic engine for the entire state, nation, and the world. To ensure the sustainability of this vital industry and support health and safety, appropriate training is necessary to avoid and mitigate any potential spills. The coast is home to the nation's largest petrochemical complex and the country's second most productive estuaries for commercial fishing. The growth of POCCA oil exports and growth in Mexico's offshore oil exploration near the border has increased the potential for a spill that could impact the entire Gulf Coast, demonstrating further need for this exceptional item.

Systemwide Priorities

Texas' future depends on a well-educated population and strong workforce. A robust higher education sector is the key to ensuring the long term economic growth and resiliency of our state. However, to assure this growth, we must do more to address the issues of college affordability and accessibility. Increasingly, qualified students--including top ten percent students--are not enrolling and graduating from college. At the Texas A&M University System, we are committed to addressing these issues, but we need the resources to help these young people access a four-year university degree and set up themselves and their families for a lifetime of success.

In order to keep higher education both accessible and affordable for students and meet these increasing needs, higher education in Texas needs additional state investment. With increased support from the state, the Texas A&M System will commit to continue to implement cost saving measures, seek efficiencies in how we provide our services, and keep tuition as low as possible for our students, while providing a high quality education that will prepare them for the workforce. However, this depends on the support from the state as detailed below:

Administrator's Statement

10/18/2022 9:10:21AM

88th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

760 Texas A&M University - Corpus Christi

Formulas – Funding for educating our students comes almost entirely from two sources, General Revenue (GR) from the state and our students' tuition and fees, but these funding streams are inversely related. As the support from the state has declined, our tuition and fees have increased to allow us to fund teaching and support for students, preparing them for entry into the workforce. Consistent formula appropriations that fund student enrollment growth and inflation are needed to avoid adverse impacts on students' success. Our highest priority is additional funding in the formulas to cover student enrollment growth through the Fall 2022 semester in the base bill and additional funding for student enrollment increases in the spring 2023 semester. Any additional funding provided through the formulas over and above covering the cost of enrollment growth will help cover inflation and offset pressure on tuition, keeping costs more affordable for our students.

Performance Based Funding for Comprehensive Regional Universities – The 87th Legislature recognized the importance of the state's 27 Comprehensive Regional Universities by passing SB1295, and using federal funding to support this legislation. For the upcoming biennium, we request \$80 million in General Revenue to provide two years of performance funding to continue student support programs at our Comprehensive Regional Universities. This amount would provide \$250,000 in base funding and \$1,000 per at-risk student per year. With this support, these institutions can help address the state's decline in direct enrollment from high school to college and close the gap in these institutions' graduation rates compared to the emerging research and research institutions. Increasing regionals' college enrollment and graduation rates will add more skilled employees to the workforce and improve regional economies.

Higher Education Group Health Insurance – Declining state support for our employees' health insurance over the last several biennia has required our institutions to cover these additional costs. We request funding to cover increases in covered enrollments and in health care costs. We also request restoration of the over 20 percent gap in funding for our employees compared to state employees in the ERS group plan.

Student Mental Health – Even prior to the pandemic we were experiencing an increased need for mental health services for our students, and the pandemic has only magnified this need. We are asking for financial support from the state to help meet this critical threat to our students' well-being.

Hazlewood Legacy Program - In FY2021, TAMUS institutions waived \$44.2m in legacy exemptions and received \$5.9m in state reimbursement, 13.3% of the cost. The cost of educating these students is shifted to other students and the average cost of the Hazlewood waiver to other students across our system is to be an estimated to be \$270 per non-legacy student per year. Veteran friendly universities with proportionally higher legacy enrollments have an outsized burden when it comes to Hazlewood, including nine of our academic institutions that have a higher proportion of legacy students than the statewide average. We request an increase in state support for reimbursing universities for their legacy Hazlewood costs.

Student Financial Aid – Increased support for student financial aid is vitally important to help students enroll in higher education and graduate with lower debt. We request increases to TEXAS grants and other financial aid programs to serve more students and provide for a larger share of their tuition and fee costs so students do not have to turn to loans to cover unmet needs. Financial aid is used by students to pay their tuition and fees and is not a substitute for state funding into the formulas.

Capital Funding: CCAPs – We are very appreciative of the commitment the 87th Legislature made to higher education with the authorization for Capital Construction Assistance Projects (CCAPs) to address our critically needed classrooms and labs. Providing two years of GR debt service appropriations for the 2024-25 biennium is of utmost importance to keep the projects on track.

Our institutions continue to have capital needs to meet student enrollment growth and programmatic needs, to update older facilities, and address deferred maintenance. Each of our institutions has prepared a request for their next CCAP if those requests are considered. However, our top priority remains funding for our formulas to help us

760 Texas A&M University - Corpus Christi

to keep costs lower and thus higher education more affordable for our students. A&M-CC's top capital priority is renovations to the Center for the Arts and the university's library. We can provide additional details upon request.

Return on Taxpayer Investment

A&M-CC is a wise investment for Texas taxpayers with an excellent return on investment with an FY21 administrative cost ratio of 8.7%. Thanks to state base support through both the formula and non-formula funding, A&M-CC is able to secure substantial amounts of external funding from a number of sources, including monies, gifts, and grants from public and private foundations, non-profit organizations, corporations, individual donors, and federal agencies. From FY11 to FY21, the total value of our institutional endowment increased 20% (from \$85M to \$102.8M). A large percentage of our faculty and staff contribute to our annual giving fund, demonstrating their commitment to our university. The TAM-CC Foundation is in the planning stages of a major capital campaign wherein they will solicit, invest, administer, and distribute donations, gifts, and bequests to provide additional support for A&M-CC students and to advance excellence in the University's programs.

A&M-CC also efficiently uses its allotted space. In Fall 2019, the most recent statistic available, we scored 92 on classroom space usage efficiency and 92 on lab usage efficiency under THECB requirements, placing us well above the official passing score of 75 in each category and, with a total of 184, far exceeding the required passing score of 150, maximizing cost-effective use of our existing space.

High Impact Research

The examples below are a testament to A&M-CC's success in delivering scientific research that results in actionable solutions to some of the most pressing economic and environmental issues confronting our state. A&M-CC research makes a high-impact difference for people around Texas.

A&M-CC's researchers impact the lives of everyday Texans. An illustration of that impact is the Harte Research Institute (HRI), which provides science-driven solutions to challenges in the Gulf of Mexico. Through its Gulf of Mexico Environmental Research Laboratory (GMERL), HRI is building the premier marine research institute dedicated to the Texas Gulf. GMERL provides mechanisms to expand Texas' international leadership role in marine science, provide solutions to real world coastal and marine issues like natural disaster response, and bolster tourism through funding, such as the \$9.5M external grant to study red snapper populations.

A&M-CC's Lone Star Unmanned Aircraft System Center (LSUASC) significantly impacts the state and nation through its research, testing, and commercialization of unmanned aircraft systems (UAS), while simultaneously providing superior educational opportunities preparing students for employment in the multi-sector UAS industry. LSUASC conducts cutting edge research with NASA, the FAA, and other research institutions in developing regulations, UAS framework design, sensor development and communications technology, the utilization of UAS technologies into a variety of industries, and integration of UAS flight at low altitudes. Since 2022, the center has received \$4M from the City of Corpus Christi to conduct a Beyond Visual Line of Sight (BVLOS) Airspace study, develop recommendations to implement its findings, and develop a state-of-the-art Mission Control Center to support routine BVLOS operations. Additionally, the center has completed 42 Non-Disclosure Agreements with prospective UAS research and industry partners and initiated the process for designation as a TDEM UAS Response Team.

As the pandemic illustrated, graduating new healthcare professionals is critical and provides an invaluable impact for the State of Texas. From FY 2010 to FY 2021, the number of our nursing graduates increased 60.6%, with over 32.3% of those graduates receiving a master's degree. At the same time, the number of health sciences graduates increased 155% over that time period. Both our Family Nurse Practitioner MSN and Doctor of Nursing Practice degrees build on our existing programs and expertise in nursing and health disparities. This is critical in South Texas due to high poverty levels and medically underserved populations in our region.

760 Texas A&M University - Corpus Christi

Business/Industry Partnerships

The Coastal Bend continues to experience rapid industrial growth. Local industrial infrastructure is currently assessed at over \$54B worth of investment from domestic and international corporations. The world's largest ethylene cracker plant is near completion by A&M-CC's industry partner, ExxonMobil, and brings an estimated 600 permanent, full-time jobs to South Texas. ExxonMobil, along with other industry growth, continues to drive a need for a well-skilled workforce, especially in the Engineering field. The construction of a new Harbor Bridge, along with the deepening and widening of the ship channel, will allow larger ships, including Very Large Crude Carriers, to access the Port of Corpus Christi. These industries indicate a strong desire to hire graduates from our region to ensure a higher retention rate in the workforce, as well as to expand partnerships with the university on educational opportunities related to port studies and research opportunities across multiple disciplines.

As our enrollment grows (an increase of 41.5% from 2002 to 2021), A&M-CC continues to add degree programs in response to the demand of the Texas economy. With the support of the state appropriations, as well as city and local industry support, we added programs in Civil (2020), Industrial (2020), Electrical (2015), and Mechanical Engineering (2009). All engineering programs are designed to support underrepresented populations in Science, Technology, Engineering, and Math (STEM) careers. In Fall 2021, Hispanics comprise 50.1% of all A&M-CC Undergraduate Engineering students and 43.5% of the degrees conferred in FY21, which is over 4 times the national average. Over 83% of A&M-CC's Engineering graduates are initially employed in Texas and approximately 40% work in the Coastal Bend supporting workforce needs of local and state industries. The Non-Formula funding for engineering supports these vitally needed programs.

Protecting Environment/Growing Public Awareness

A&M-CC is internationally recognized for our marine science programs and public education initiatives on the environment. Public awareness boosts the Texas economy, especially in tourism (\$76.7B) and sport fishing (\$7.2B annually) and highlights the importance of the region's oil and gas industry. Programs that support this initiative include A&M-CC's Center for Water Supply Studies, Center for Coastal Studies, and Environmental Learning Center and Aquatic Education Program.

These programs address water quality and supply issues, conduct ecological monitoring and provide educational opportunities to K-16 students and the general community regarding one of Texas' most valuable resources – its reservoirs, rivers, bays, estuaries, aquifers, and the Gulf of Mexico.

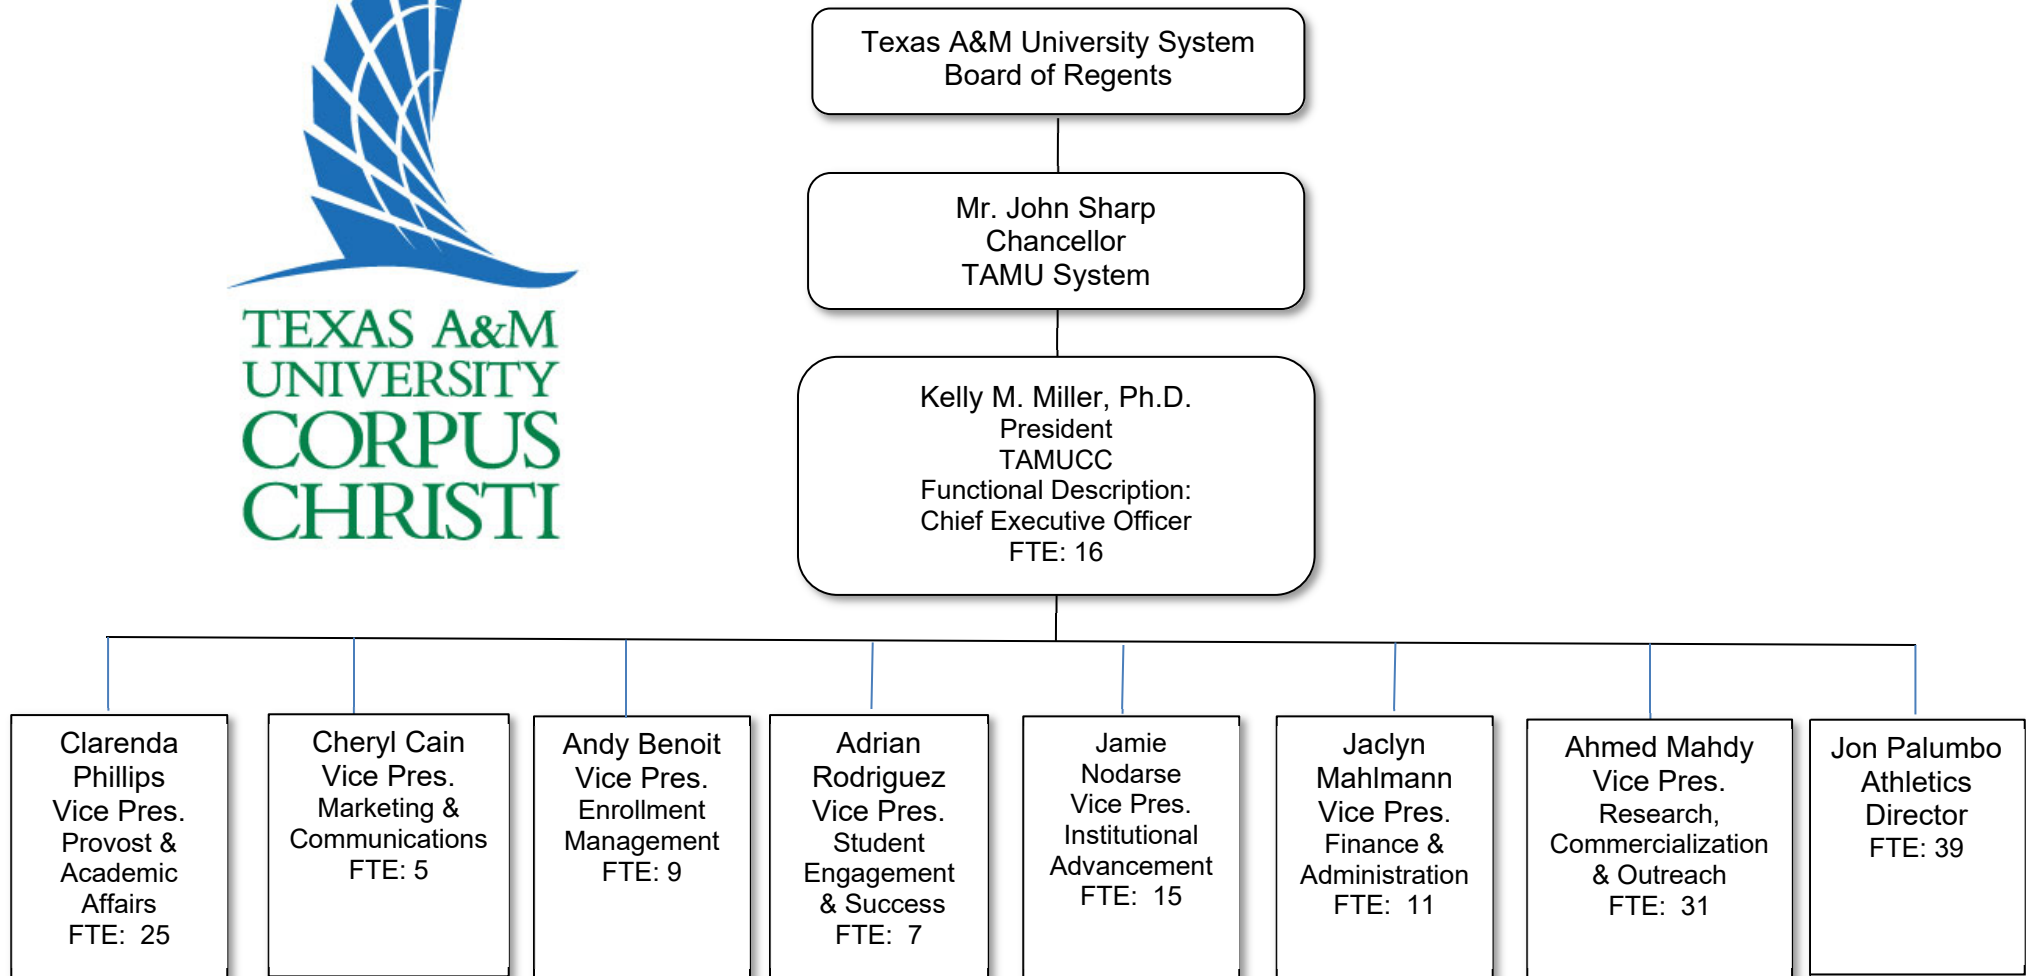

Enhancing Quality of Place

Quality of place is a key factor in advancing economic development and attracting new investment. Additionally, the ability to attract and retain young people to the Coastal Bend increasingly depends on quality of place. A&M-CC's visual and performing arts programs are major contributors to enhancing the cultural life of South Texas. As the premier fine arts facility south of San Antonio, the Art Museum of South Texas operates educational facilities and an art museum which advance awareness and enjoyment of the visual arts for over 150,000 visitors each year.

Background Checks

A&M-CC conducts criminal background checks under Texas Education Code Section 51.215, which allows an institution of higher education to conduct background checks on employees of the university. It is A&M-CC's policy and practice to conduct such checks on all prospective employees considered for positions at A&M-CC.

TEXAS A&M UNIVERSITY-CORPUS CHRISTI UNIVERSITY ORGANIZATIONAL STRUCTURE

CERTIFICATE

Agency Name Texas A&M University - Corpus Christi

This is to certify that the information contained in the agency Legislative Appropriations Request filed with the Legislative Budget Board (LBB) and the Governor's Office Budget Division (Governor's Office) is accurate to the best of my knowledge and that the electronic submission to the LBB via the Automated Budget and Evaluation System of Texas (ABEST) and the PDF file submitted via the LBB Document Submission application are identical.

Additionally, should it become likely at any time that unexpended balances will accrue for any account, the LBB and the Governor's Office will be notified in writing in accordance with Article IX, Section 7.01 (2020-21 GAA).

CODE	DESCRIPTION	Exp 2021	Est 2022	Bud 2023	BL 2024	BL 2025
------	-------------	----------	----------	----------	---------	---------

STRATEGY DESCRIPTION AND JUSTIFICATION:

To provide funds for the statutorily mandated unemployment compensation insurance program (Article 8308b, V.A.C.S.). This compensation insurance program provides partial income continuation for regular employees impacted by reductions in workforce. This program is part of the total compensation and benefit package that is designed to assist in attracting and retaining qualified employees.

Only components of The University of Texas and Texas A&M University Systems have this strategy because they operate their own risk pools. These General Revenue Fund appropriations are used for unemployment compensation insurance.

------	-------------	----------	----------	----------	------------------------	------------------------

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Infrastructure Support formula distributes funding associated with plant-related formulas and utilities. This formula is driven by the predicted square feet for universities' educational and general activities produced by the Coordinating Board Space Projection Model.

The portion of the formula related to utilities is adjusted to reflect differences in unit costs for purchased utilities, including electricity, natural gas, water and wastewater, and thermal energy.

STRATEGY DESCRIPTION AND JUSTIFICATION:

This funding develops and expands TAMU-CC's Mechanical Engineering (MEEN) and Electrical Engineering (EEEN) programs. This investment will:

- help address the critical shortage of Mechanical and Electrical Engineers in the region and state;
- increase the diversity of Mechanical and Electrical Engineering graduates;
- support associated activities that develop a robust pipeline of students prepared to enter and succeed in Mechanical and Electrical Engineering programs, and
- support existing university research focused on coastal resiliency and marine issues as well as autonomous, sustainable, and emerging technologies.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The mission of the TAMU-CC Blanche Davis Moore Early Childhood Development Center (ECDC) is to serve as a comprehensive educational & research facility for early childhood education. The ECDC supports a partnership between TAMU-CC's College of Education & Human Development & Corpus Christi Independent School District (CCISD) & also serves as a hub for early childhood development training & research across the Coastal Bend region. The partnership focuses on equitable education, instructional excellence, & collaborative services for CCISD students, teachers, administrators, parents & TAMU-CC university students. Beginning in Fall 2023, the ECDC will serve as a pre-Kindergarten elementary school for 4 year-old's (PK-4) under eligibility requirements in Texas Education Code §29.153. The ECDC serves as a clinical preparation setting for TAMU-CC early childhood education & nursing students & is designed for direct instruction, health/wellness evaluation, co-teaching, observation, & teacher preparation assessment. Clinical experience is a key component in preparation of TAMU-CC students studying early childhood & elementary education as well as nursing, health sciences, & counseling.

TAMU-CC students benefit from this partnership through training on early childhood education programming & research. The ECDC students & faculty also benefit from access to university facilities, providing innovative programming & a variety of educational experiences.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The purpose of this funding is to develop and expand TAMU-CC's Civil and Industrial Engineering programs, which began in Fall 2020, to allow for continued development. This investment will:

- Help address the critical shortage of civil and industrial engineers in the region and state;
- Increase the diversity of engineering graduates in Civil and Industrial Engineering;
- Support associated activities that develop a robust pipeline of students prepared to enter and succeed in engineering programs, and
- Support existing university research focused on coastal resiliency, advanced construction materials, the marine environment, human/system interactions, and industrial safety, as well as autonomous systems, sustainability, and emerging technologies.

TAMU-CC's Center for Coastal Studies (CCS) has grown significantly as an interdisciplinary coastal and marine ecological research group conducting basic and applied research, environmental monitoring, public education outreach, and undergraduate and graduate education through our research. CCS also fosters collaborative research among faculty through research grants and contracts.

The mission of the CCS is to increase knowledge and understanding of coastal and marine ecosystems of the Texas coast and Gulf of Mexico, their biota, and their socioeconomic contributions to Texas coast and Gulf of Mexico. CCS accomplishes this mission by conducting interdisciplinary research and providing a strong program that includes public education and outreach to the community.

Non-Formula funding provides for the vital administrative framework to facilitate this mission. Research typically assists local (City of Corpus Christi & Port of Corpus Christi), statewide (Texas Commission on Environmental Quality, Texas General Land Office, Texas Parks & Wildlife Dept.), and federal (Dept. of Energy (DOE), National Oceanic & Atmospheric Administration, U.S. Army Corps of Engineers, U.S. Environmental Protection Agency, U.S. Fish & Wildlife Service, National Science Foundation) agencies.

CCS has enhanced the scientific endeavors and strategic partnerships that have contributed significantly to human understanding of marine and coastal environments that affect the quality of our lives.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The primary goal of the Gulf of Mexico Environmental Research Laboratory (GMERL) at TAMU-CC's Harte Research Institute for Gulf of Mexico Studies (HRI) is the development of a premier marine research institute focused on the Gulf of Mexico. GMERL provides the mechanism to expand and propel Texas into a premier role in marine sciences. Building on TAMU-CC's strengths in ocean observation, GIS, and applied coastal and marine studies, GMERL broadens cooperation and application of research efforts with academia, industry, and the military to provide real-world solutions, including pressing coastal and marine issues like responding to natural and manmade disasters. The interdisciplinary design of TAMU-CC's HRI makes it a recognized leader in the community of marine science institutes. Through local, state, national, and international collaboration, HRI addresses ecosystem scale problems and promotes the concept people and the environment are inexorably linked in their solution.

The LSUASC and its EM program advance the integration of UAS, and Autonomous Aviation (AAV) technologies across educational, public, and commercial agency interests; provides economic stimulus by attracting industry partners to Texas; informs governing agencies on UAS and AAV operations in the National Airspace System; integrates UAS capabilities into Texas Division of Emergency Management (TDEM) and disaster resiliency plan for Texas at county and state level, beginning in the coastal region. LSUASC helps prepare participants for jobs requiring UAS ability and provides opportunities in STEM fields to Hispanic, first-generation, and low-income students. The appropriation will allow for:

- Advances in UAS and AAV technology integration across educational and government agencies, including emergency & disaster response teams.
- Provision of advanced autonomous vehicle services, systems monitoring, operations support, live virtual and constructive simulation, and test /validation capabilities to LSUASC and TAMUCC.
- Partnership continuation between the FAA and LSUASC for the development of a Beyond Visual Line of Sight (BVLOS) state-wide authorization to further UAS and AAV experimentation, safety, and integration.
- Sustaining partnerships with state and local agencies across Texas in the design, construction, and execution of standardization and certification programs for a variety of public safety entities such as first responders and disaster response personnel to name a few.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The mission of The Center for Water Supply Studies (CWSS) at TAMU-CC is to address water supply issues in South Texas by conducting relevant research, disseminating information via partnerships with local, state and federal agencies, and evaluating resource management strategies. This research impacts water quality/quantity in reservoirs, rivers, bays, estuaries, and aquifers, and educates citizens in understanding water supply issues, and develops synergy between other institutions of higher education and CWSS.

CWSS is committed to:

- conducting research on surface water systems and on subsurface aquifer characterization and stratigraphic complexity through quality data collection and modeling;
- assessing management strategies for maintaining water quality and quantity while balancing conservation and resource needs;
- compiling, analyzing and disseminating data gathered by the CWSS and partner agencies, and
- supporting TAMU-CC's research and education goals as well as our commitment to public service.

CWSS integrates our research with the mission of TAMU-CC and the Momentum 2020 Strategic Plan by enhancing the practical experience of undergraduate and graduate students at the convergence of a variety of disciplines and marketable skills. The CWSS mission directly aligns with the "Building a Talent Strong Texas".

STRATEGY DESCRIPTION AND JUSTIFICATION:

The mission of the Art Museum of South Texas (AMST) is to operate educational facilities and an art museum to advance awareness, knowledge, appreciation and enjoyment of the visual arts for TAMU-CC students, residents, and visitors. To meet this educational and public service mission, AMST presents a variety of programs including exhibitions, classes, lectures, films, performances, and other activities that generate and sustain community interest in fine arts. Activities are offered at AMST, the Antonio E. Garcia Arts & Education Center (located in an economically and educationally underserved neighborhood), and other outreach venues. The Art Museum of South Texas actively collects, conserves, exhibits, researches, and interprets outstanding works of visual art.

AMST is a significant economic contributor to our region and state through cultural tourism. AMST welcomed over 95,000 visitors in 2021; 96% from the U.S. (all 50 states represented) and 4% international. In collaboration with research and academic units at TAMU-CC, AMST plans and implements activities for area colleges/universities, public, private, and charter K-12 schools, senior citizen organizations, social service/criminal justice agencies, the City of Corpus Christi and Visit Corpus Christi.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The TAMU-CC Coastal Bend Business Innovation Center (CBBIC) supports economic development and job creation in Corpus Christi and surrounding rural communities. Our mission is two-fold: (1) providing business assistance to entrepreneurs at every level of development and (2) assisting rural community leaders in developing strategies to improve quality of services provided to residents, improve the climate for small businesses, and support overall economic development. CBBIC's Communities as a Start Up (CASU) initiative empowers communities to think with an entrepreneurial mindset. CBBIC offers client support services to startup businesses in the region that include access to business expertise and low-cost administrative services and office facilities. CBBIC also provides business education outreach workshops to assist start-ups or established businesses in better recognizing and fulfilling the needs and expectations of their customers.

With the impact of Hurricane Harvey in 2017 and COVID-19 beginning 2020, CBBIC is a strategic partner with the U.S. Economic Development Administration (EDA) to drive long-term economic recovery and resilience for South Texas. Given our mission to support startup businesses and rural communities struggling with economic development, it is essential that CBBIC funding be maintained at current levels.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The mission of the Environmental Learning Center (ELC), along with the associated Aquatic Education Program (AEP), is to provide relevant scientific information about the coastal zone to K-12 students and the public through interactive programming. The main goals are to educate individuals about coastal ecosystems through field experiences and to encourage participants' understanding and appreciation of their natural surroundings.

The program continues to provide value-added service to TAMU-CC researchers, whose projects increasingly require an education and outreach component that engages with the public on scientific topics. We also support the educational and research needs of state and local government agencies. Funds are used for development and provision of educational activities focused on the ecology and history of the Texas coast. These efforts are simultaneously effective for satisfying sponsored funding requirements and for producing well-informed ecological stewards empowered with information to make sound environmental decisions in their communities. This program benefits statewide natural resources, enhances environmental education in the state, and assists TAMU-CC in recruiting STEM students.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The mission for the Institutional Enhancement (IE) Non-Formula Support is to supplement the institution's base funding to support core academic operations. In addition, this funding provides the university with the financial support necessary to provide students with top-tier faculty who play a critical role in closing the educational gaps which exist in South Texas. A significant portion of these funds are dedicated to enhancing student support services. These services focus on retention efforts such as the First-Year Learning Communities Program, the Centers for Academic Success and Advising, Core Curriculum activities, additional student academic scholarships, and targeted recruitment efforts, all of which have a significant impact on TAMU-CC doing its part to ensure Texas achieves its "Building a Talent Strong Texas" education goals. The university, through this item, continues to make progress toward closing the gaps for success for the Hispanic community in higher education. In TAMU-CC's strategic plan, the university has targeted enrollment growth and increasing the educational attainment of a historically underserved region as a high priority.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Texas Comprehensive Research Fund provides funding to promote increased research capacity at eligible general academic teaching institutions including those other than The University of Texas at Austin, Texas A&M University or any institution designated as an emerging research university under the Higher Education Coordinating Board's (THECB) accountability system.

Funding is to be expended for the support and maintenance of educational and general activities, including research and student services, that promote increased research capacity.

A legislatively determined amount of funding is allocated based on the average amount of restricted research funds expended by each institution per year for the three preceding state fiscal years as reported to THECB.

FULL-TIME EQUIVALENT POSITIONS (FTE):		18.00	18.00

DESCRIPTION / JUSTIFICATION:

Texas has lost 80% of its oyster reefs to overfishing, pollution, and hurricane damage. A high percentage of seafood consumed in Texas is imported from other Gulf states because Texas has no commercial aquaculture in its coastal waters. This exceptional item enhances coastal economic resilience through creation of a new industry for Texas that links oyster aquaculture with the health of the coastal marine environment. Among the many benefits this item would include are 1) Development of a focused education and training program for workforce development of the commercial oyster aquaculture industry. Funds would establish training programs for both hatchery operation and farm management along with the creation of approximately 2,000 new jobs associated with oyster hatchery, farming, supply-side, and retail sectors development; 2) post-processing oyster economic value to the state in excess of \$100M; 3) Integration of oyster aquaculture with ecosystem health. Funds would be used to develop aquaculture-based research programs, in hatcheries and on farms, and to enhance ecosystem services provided by oyster reefs through restoration and shoreline stabilization; and 4) Establish a comprehensive industry development plan for commercial oyster aquaculture creating a competitive edge for Texas oysters. Funds would be used to create a marketing plan for Texas oysters enabling our state to become an industry leader.

EXTERNAL/INTERNAL FACTORS:

TAMU-CC is best equipped to solve the aforementioned needs because 1) The Legislature established the RESTORE Act funding which resulted in the establishment of an Oyster Resource and Recovery Center; 2) TAMU-CC is home to the Harte Research Institute for Gulf of Mexico Studies, leading research efforts in Texas on oyster aquaculture and reef restoration; and 3) TAMU-CC has the only Master's degree program in the state focused on marine aquaculture.

FULL-TIME EQUIVALENT POSITIONS (FTE):		3.00	3.00

DESCRIPTION / JUSTIFICATION:

- Given recent rapid growth in the production and transportation of oil and natural gas up and down the Texas coast, there is increased need for additional resources for state agencies, students, and workers in the Emergency Management and energy industries to offer specialized nearshore and offshore oil and hazardous material response training that does not currently exist in Texas related to spill prevention, planning, and response.
- The Texas A&M University-Corpus Christi (TAMU-CC) National Spill Control School (NSCS) was established in 1977 and serves as a consulting, training, and research resource for the National Response Team created by the US Oil Pollution Act of 1990.
- Expansion of the NSCS will increase the number of personnel (currently one employee) and courses offered in response to increased Texas oil exports, an exceptional investment by and for the State of Texas to protect the coastline, Texas beaches, and vital infrastructure.
- With this funding, NSCS will support essential and mandatory training to Texas state agencies at a reduced or no-fee rate, as well as enable them to serve as a spill advisor to those agencies, port industries, and ports throughout Texas, including the Port of Corpus Christi Authority (POCCA).

EXTERNAL/INTERNAL FACTORS:

- POCCA continues to experience significant growth and development of oil export facilities and increased traffic. Further, POCCA has become the #1 exporter of crude oil in the nation. The capacity of pipelines that intersect in Corpus Christi and the Coastal Bend continues to support economic growth to state and local economies. Phillips 66 applied to the Maritime Administration for the necessary permits to build and operate two flexible oil buoys to be positioned 21 nautical miles east of the POCCA entrance at Aransas Pass, with oil sent via offshore pipeline to feed the mooring buoys and to load oil tankers offshore.

Agency code: **760** Agency name: **Texas A&M University - Corpus Christi**

CODE	DESCRIPTION	Excp 2024	Excp 2025
	<ul style="list-style-type: none">• The NSCS is strategically positioned to help stakeholders (local, state, and industry partners) prepare for a spill and ensure the safety of the public and responders. Oil spill training, exercises, testing of new equipment, and participation in the South Texas Coastal Area Committee are fundamental to effectively manage a potential spill in Texas waters, considered a disaster under the Texas Government Code. <p>Year established and funding source prior to receiving special item funding:</p> <ul style="list-style-type: none">• Established 1977• Formula Funding (N/A)• Non-GR sources of funding: None <p>Consequences of Not Funding:</p> <ul style="list-style-type: none">• Loss of potential funding for the NSCS will mean that current government, industry, and university students will continue to use old spill equipment, outdated classroom teaching technology, main classroom engineering modifications not being made to fix the air conditioning system, and dependence on old boats that break down routinely.• New coastal and offshore spill training courses will not be initiated for the Port of Corpus that is the leading export of oil in the United States , and a state as a whole, with one of the largest offshore production capacities and expansive shorelines and wetlands vulnerable to large oil spills. <p>PCLS TRACKING KEY:</p>		

DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :

Continued direct support to county-level Offices of Emergency Management and State Agencies by providing oil and hazardous substance spill awareness courses. A certification program for State of Texas oil and hazmat responders and third party organizations with an emphasis on expanding coastal and offshore oil spill response preparedness training.

	Total Expenditures		19.8%		\$8,496,434	\$42,928,199		17.0%		\$8,220,345	\$48,284,974

B. Assessment of Attainment of HUB Procurement Goals

Attainment:

In FY 2020, Texas A&M University – Corpus Christi (760) overwhelmingly exceeded one of the five applicable TAMU-CC HUB procurement goals for Building Construction.

In FY 2021, Texas A&M University – Corpus Christi (760) exceeded three of the five applicable TAMU-CC HUB procurement goals for Building Construction, Professional Services, and for Commodities.

Applicability:

For fiscal years 2020 and 2021, the Heavy Construction category was not deemed applicable to the agency's operations and minimal expenditures were reported in this category

Factors Affecting Attainment:

Building Construction: Texas A&M University – Corpus Christi excels in Building Construction

Special Trade Construction: Since CIP (Construction in Progress) Accounts are used for most of our Construction, they are reported under the Building Construction amounts and percent's.

Professional Services: We have since improved our Professional Services from FY2020 to FY2021 and exceeded our goal and strive to continue the same track.

Other Services: Even though we have increased our usage of Other Services from 4.53% to 6.80%, TAMU-CC has not yet exceeded this goal. The majority of expenditures that were associated with other services contracts were competitively bid and awarded on best value.

Commodities: We have since improved our Professional Services from FY2020 to FY2021 and exceeded our goal and strive to continue the same track.

Agency Code: 760 Agency: Texas A&M University - Corpus Christi

Overall: Due to COVID we have seen a drop in HUB and small business availability affecting the supply chain and procurement from FY 2020 to FY 2021.

C. Good-Faith Efforts to Increase HUB Participation

Outreach Efforts and Mentor-Protégé Programs:

Active Mentor-Portege Program ongoing is 1 and added in Fiscal Year 2022 is 0.

Event and activity economic opportunity forum hosted 1 and attended 2. Annual meeting / setting attended 2. Advocacy group meeting (i.e., MOAs, TAAACC, TAMACC, etc.) 2. Other (Subcontractor training & Departmental HUB Training) hosted 3 and attended 1.

HUB Program Staffing:

HUB personal is as followed:

Director, Procurement Services and HUB is 25 % of weekly hours with HUB, 50% weekly hours with purchasing, and 10% weekly hours with contract.

HUB Coordinator is 85 % of weekly hours with HUB, 10% weekly hours with purchasing, and 5% weekly hours with contract.

Senior Buyer is 10 % of weekly hours with HUB, 80% weekly hours with purchasing, and 10% weekly hours with contract.

Buyer is 10 % of weekly hours with HUB, 80% weekly hours with purchasing, and 10% weekly hours with contract.

Administrative Associate is 5 % of weekly hours with HUB, 50% weekly hours with purchasing, and 0.00% weekly hours with contract.

Current and Future Good-Faith Efforts:

Meet twice a year with the HUB Advisory Committee Members on campus after the Semi and Annual Report post , to provide an after-action report, and what we can do to improve TAMU-CC HUB numbers and participation. Recognize department's HUB good faith efforts on the TAMU – CC newsletter creating a competition on the use of HUBs. Attended and presented multiple In-reach / Out-reach vendor forums, webinars, trainings, and in person collaborations to inform vendors how to do business with our university, how to fill out HSPs and how to become a HUB Vendor. Partnered with our Local PTAC (Procurement Technical Assistance Center) to give trainings and information on HUBs for small businesses and minority vendors. Monitoring the use of the procurement card for non-HUB purchases and identify HUB vendors that could supply the goods or services bought. Monitor HUB Subcontracting Plans on projects over \$100,000 to make sure they meet HUB requirements and Progress Assessment Reports to tract payments to HUB subcontractors.

Art Museum

(1) Year Non-Formula Support Item First Funded:	1996
Year Non-Formula Support Item Established:	1945
Original Appropriation:	\$263,609

(2) Mission:

The mission of the Art Museum of South Texas (AMST) is to operate educational facilities and an art museum to advance awareness, knowledge, appreciation and enjoyment of the visual arts for TAMU-CC students, residents, and visitors. To meet this educational and public service mission, AMST presents a variety of programs including exhibitions, classes, lectures, films, performances, and other activities that generate and sustain community interest in fine arts. Activities are offered at AMST, the Antonio E. Garcia Arts & Education Center (located in an economically and educationally underserved neighborhood), and other outreach venues. The Art Museum of South Texas actively collects, conserves, exhibits, researches, and interprets outstanding works of visual art.

AMST is a significant economic contributor to our region and state through cultural tourism. AMST welcomed over 95,000 visitors in 2021; 96% from the U.S. (all 50 states represented) and 4% international. In collaboration with research and academic units at TAMU-CC, AMST plans and implements activities for area colleges/universities, public, private, and charter K-12 schools, senior citizen organizations, social service/criminal justice agencies, the City of Corpus Christi and Visit Corpus Christi.

(3) (a) Major Accomplishments to Date:

AMST accomplishments include, but are not limited to:

- Arts education programs provided to all local public schools within a 75 mile radius focused on Science, Technology, Engineering, Arts, and Math (STEAM) education, serving 25,000+ K-12 students annually
- The permanent collection has grown to over 1,900 works for enhanced learning/research in art history, theory, and techniques, accessible to all TAMU-CC students at no cost
- Exhibits from AMST's collection sent to 15 U.S. museums
- National accreditation by the American Alliance of Museums
- Research project completed on Texas artist Dorothy Hood including a publication and major retrospective exhibition; a partnership with the University of Houston Special Collections to digitize Hood's archives; Hood exhibition had a major tourism impact of 26,083 visitors (4,300 from outside of Texas; 37 states, 10 countries) and the Hood collection hands-on activities were recognized internationally
- Opened new galleries for Spanish Colonial, Pre-Columbian and contemporary Hispanic Art aiding TAMU-CC's Hispanic Serving Institution role
- Collaboration with important regional and national museums on collection sharing through exhibition planning and loans
- Ongoing collaborations with area non-profits including K Space Contemporary, Art Center, Corpus Christi Symphony Orchestra, Rockport Center for the Arts, and Buccaneer Commission
- Increased embedded technology in exhibitions and education programs and virtual contributions

(3) (b) Major Accomplishments Expected During the Next 2 Years:

760 Texas A&M University - Corpus Christi

- AMST will continue to expand dynamic collaborative programs and activities with TAMU-CC students/faculty and the community by enhancing education and research.
- AMST will enhance K-12 educational outreach into surrounding communities and offer additional programs at area senior centers; the exhibition program will channel resources to bring important exhibits to South Texas.
- AMST will review the Museum's Permanent Collection in collaboration with TAMU-CC faculty/students, providing research opportunities in art criticism, conservation, collection care and policy.
- AMST will expand its role as an economic development engine by building upon recent successful corporate recruitment and tourism initiatives.
- AMST will focus on IDEA (Inclusivity, Diversity, Equity, and Accessibility) efforts, making museum exhibitions and programs accessible to a wider audience and eliminating barriers to art experiences.
- AMST will begin the two-year re-accreditation process in 2023, to be completed in March of 2025.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

Prior funding sources include the City, State, Federal, and private grants, individual and business/corporate support, admissions, gift shop revenue, program fees, and fundraising activities.

(5) Formula Funding:

N/A

(6) Category:

Public Service

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Non-general revenue sources include the City, State, Federal and private foundation grants, individual gifts, business/corporate support, admissions, gift shop revenue, program fees, and revenue from special fundraising activities.

AMST works diligently on diversifying our non-general sources of revenue and in the last biennium, AMST matched State dollars significantly above the required 2:1 match, with a total revenue of approximately \$3.5 million. The Board of Trustees, volunteers and staff work diligently to broaden the base of support to meet the needs of the institution.

(9) Impact of Not Funding:

760 Texas A&M University - Corpus Christi

If not funded, programming would be catastrophically impacted and educational activity would be dramatically cut, thus negatively impacting the community and region. Programs serving TAMU-CC students, the community, and the state would have to be cut as private sector funding, which currently supports these expenses, would need to be redirected to support the salaries currently provided through Non-Formula Funding. Staffing levels and capacity would be significantly reduced. It is doubtful that increased community funding could be secured to provide necessary financial support for all the annual operating budget needs, including those met through Non-Formula Funding.

Generating enough revenue in the near term to compensate for a funding cut would also be impossible with fewer staff. An important recognized TAMU-CC community outreach program would also end and a significant reduction in program opportunities for students who seek to learn about museums, art history, art research, and art education teaching strategies would occur.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

Permanent

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

The Art Museum is reviewed every year to ensure they are receiving matching local gifts, grants and donations. In addition, TAMUCC also reviews annually the makeup of museum visitors as well as their K-12 outreach to ensure the museum is achieving its mission.

760 Texas A&M University - Corpus Christi

Center for Coastal Studies

(1) Year Non-Formula Support Item First Funded:	1992
Year Non-Formula Support Item Established:	1984
Original Appropriation:	\$250,000

(2) Mission:

TAMU-CC's Center for Coastal Studies (CCS) has grown significantly as an interdisciplinary coastal and marine ecological research group conducting basic and applied research, environmental monitoring, public education outreach, and undergraduate and graduate education through our research. CCS also fosters collaborative research among faculty through research grants and contracts.

The mission of the CCS is to increase knowledge and understanding of coastal and marine ecosystems of the Texas coast and Gulf of Mexico, their biota, and their socioeconomic contributions to Texas coast and Gulf of Mexico. CCS accomplishes this mission by conducting interdisciplinary research and providing a strong program that includes public education and outreach to the community.

Non-Formula funding provides for the vital administrative framework to facilitate this mission. Research typically assists local (City of Corpus Christi & Port of Corpus Christi), statewide (Texas Commission on Environmental Quality, Texas General Land Office, Texas Parks & Wildlife Dept.), and federal (Dept. of Energy (DOE), National Oceanic & Atmospheric Administration, U.S. Army Corps of Engineers, U.S. Environmental Protection Agency, U.S. Fish & Wildlife Service, National Science Foundation) agencies.

CCS has enhanced the scientific endeavors and strategic partnerships that have contributed significantly to human understanding of marine and coastal environments that affect the quality of our lives.

(3) (a) Major Accomplishments to Date:

Major accomplishments include the continuation of long-term collaborative partnerships with state and federal agencies to provide the best scientific information for healthy ecosystems and the coastal economy. In addition, since its inception, CCS has trained students in research on coastal and marine ecology and resource management. This achievement is reflected in over 600 grants and contracts, \$25+ million in extramural funding, 155+ technical reports, 250+ peer-reviewed publications, and employment of 1,000+ students.

Since 1992, CCS has leveraged Non-Formula funds, achieving an almost 3:1 return on every Non-Formula dollar invested, averaging \$850,000/year in external funding. This provides for fundamental and advanced training of undergraduate and graduate students on natural resource and environmental issues specific to Texas, and resulted in the hiring of our graduates in every major state and federal natural resource/environmental agency operating in Texas.

A recently approved federal grant from the DOE will assist recruitment of traditionally underserved undergraduate and graduate students to participate in collaborative research between the CCS and two DOE national laboratories.

760 Texas A&M University - Corpus Christi

(3) (b) Major Accomplishments Expected During the Next 2 Years:

CCS will expand and enhance its research staff, scope of activities, and facilities, enabling it to actively recruit and train high caliber undergraduate and graduate students for the natural resource research and management communities.

The work in the Laguna Madre, 1 of 6 hypersaline lagoons in the world, will result in publications that characterize historic and recent changes in this ecologically significant but delicate ecosystem.

CCS will work to generate more indirect costs to invest in state-of-the-art equipment, train new experts, and work with resource agencies and governments to expand research initiatives.

CCS will continue working with the City of Corpus Christi, the TCEQ, and the EPA concerning the Total Maximum Daily Load and Implementation Plans dealing with bacteria loads to our local recreational waters. This further protects vital natural and economic resources. CCS will also collaborate with the Port of Corpus Christi on issues of plastic pollution, invasive species, and protection of sensitive wetlands.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

N/A

(5) Formula Funding:

N/A

(6) Category:

Research Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

CCS actively pursues non-general sources of funding, averaging approximately \$850,000+ per year. CCS will continue to secure funding from existing partners, including the EPA, DOE, NSF, and NOAA. Thanks to well-established relationships, the CCS will continue to pursue funding from TCEQ and TGLO.

Students are encouraged to submit funding proposals as part of the educational process and, through mentoring efforts, our success is over 80%, producing approximately \$1,500/project in valuable support dollars. Regional funding from the Coastal Bend Bays and Estuaries Program supports work with local colonias on water monitoring through civilian and student sampling initiatives.

(9) Impact of Not Funding:

760 Texas A&M University - Corpus Christi

Failure to fund this item will negatively impact research and education, with particularly detrimental effect on South Texas. Novel research related to migration of coastal species and management of natural resources and public safety would cease, as would meeting the educational/training needs of South Texas students in natural resource and environmental career paths. Failure to fund will also permanently remove a long term value-added service that, thus far, has produced hundreds of TAMU-CC graduates in the workforce that serve their respective communities. These reductions will result in the departure of scientists and staff with extensive knowledge of our community and, in turn, compromise a timely response to coastal environmental issues for Texas.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

Permanent

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

TAMU-CC's Center for Coastal Studies is internally reviewed on the volume of research published and outside funding attained to ensure it is leveraging ratios of non-general revenue sources. An external advisory committee will assist the Center with assessment and developing ways to expand its scope and reach.

760 Texas A&M University - Corpus Christi

Civil and Industrial Engineering Program

(1) Year Non-Formula Support Item First Funded:	2020
Year Non-Formula Support Item Established:	2020
Original Appropriation:	\$1,150,000

(2) Mission:

The purpose of this funding is to develop and expand TAMU-CC's Civil and Industrial Engineering programs, which began in Fall 2020, to allow for continued development. This investment will:

- Help address the critical shortage of civil and industrial engineers in the region and state;
- Increase the diversity of engineering graduates in Civil and Industrial Engineering;
- Support associated activities that develop a robust pipeline of students prepared to enter and succeed in engineering programs, and
- Support existing university research focused on coastal resiliency, advanced construction materials, the marine environment, human/system interactions, and industrial safety, as well as autonomous systems, sustainability, and emerging technologies.

(3) (a) Major Accomplishments to Date:

Major accomplishments in Civil and Industrial Engineering programs since their inception in 2020 include:

- Hiring of three new Civil Engineering faculty;
- Hiring of the Rogelio "Roger" Benavides Memorial Professor in Industrial Engineering, an endowed chair position in industrial safety;
- Increasing enrollments in Civil Engineering by 291% and in Industrial Engineering by 80% between Fall 2020 and Spring 2022;
- Achieving Hispanic enrollment of 59.6% in Spring 2022 in Civil and Industrial Engineering programs;
- Establishing of NSF CREST Center for Geospatial and Environmental Informatics, Modeling and Simulation at TAMU-CC, a 5-year, \$5 million grant involving Civil Engineering faculty, among others;
- Obtaining federal funding of almost \$1.2 million and state and regional funding of \$93,600 to investigate stormwater runoff, water quality and habitat changes in the upper Laguna Madre, and geospatial investigations of associated environments;
- Securing funding of \$2 million by the Corpus Christi Type A Board for instructional laboratories in Civil and Industrial Engineering;
- Submitting for THECB approval a proposal for an MS in Engineering program with a "fast-track" five-year BS/MS option;
- Hosting STEM Summer Camps for middle and high school students, and
- Continuing curriculum design and development to ensure graduates are ready to meet region and state workforce demands, with input from local industry.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

760 Texas A&M University - Corpus Christi

Over the biennium, TAMU-CC will:

- Fully implement the new Civil and Industrial Engineering programs to expand research and education in engineering while enriching student's learning experiences, including the continued development in the new areas of coastal resiliency and autonomous mobility;
- Grow enrollments in Civil and Industrial Engineering by over 175%;
- Experience the first graduations of Civil and Industrial engineering majors;
- Seek accreditation of the Civil and Industrial Engineering programs by ABET at the earliest possible time, with request for evaluation expected to be submitted January 2024;
- Develop articulation agreements with Del Mar College;
- Form multidisciplinary teams to explore research/educational opportunities, including advanced construction materials, coastal resiliency, human/system interactions, and autonomous vehicles;
- Develop state-of-the-art research laboratories and efforts in construction materials, geospatial sensing, water quality and runoff management, industrial safety, and human/system interaction;
- Pursue external funding to support educational and research programs;
- Pursue external funding for scholarships supporting vertical integration of the STEM pipeline, including high school students, veterans, and educators;
- Enhance student internships with industries in the area to provide increased opportunities for our Civil and Industrial Engineering students.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

NA

(5) Formula Funding:

As a relatively new program established in Fall 2020, with primarily new first-year students, funds generated under formula funding have been minimal, as few upper-level Civil or Industrial Engineering courses have been taught as of yet.

(6) Category:

Instructional Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

The City of Corpus Christi awarded \$2M to support the new Civil (\$1,300,000) and Industrial engineering (\$700,000) B.S. degree programs. The market value of the Engineering-related endowment (for all Engineering programs) is \$6.06 million. The estimated distribution for scholarships in 2021-2022 totaled \$263,742.41. The total support for Engineering from the endowment, including the scholarships and the Benavides Endowed Chair was \$301,742.41.

(9) Impact of Not Funding:

760 Texas A&M University - Corpus Christi

The community strongly supports TAMU-CC's Engineering programs. The funding provides the ability to focus on the unique engineering needs in both South Texas and statewide, particularly for underrepresented populations. The funding also enables the engineering program to extend its recruitment of STEM students, including summer camps for future women engineers and virtual engineering summer camps. Maintaining the engineering education contained in these programs is vital to closing the gap. Failure to fund the TAMU-CC Civil and Industrial Engineering programs will significantly reduce, if not eliminate, our ability to grow and develop these programs. Failure to secure these funds will negatively impact our ability to:

- Hire Civil and Industrial Engineering faculty and associated necessary resources;
- Hire a laboratory coordinator and administrative assistant;
- Fund library resources for the program;
- Maintain and upgrade the Engineering machine shop and Engineering labs for students;
- Fund IT/computer workstations for Civil & Industrial Engineering students, and
- Offer three summer camp programs for middle & high school students.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

Permanent

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

TAMU-CC will internally monitor recruitment, retention, and graduation rates for these programs. Programs will also be reviewed on a regular basis as required for ABET accreditation.

760 Texas A&M University - Corpus Christi

Coastal Aquaculture for the Texas Economy

(1) Year Non-Formula Support Item First Funded: 2024

Year Non-Formula Support Item Established: 2024

Original Appropriation: \$2,000,000

(2) Mission:

The mission of this item is to enhance coastal economic resilience through creation of a new industry for Texas that links oyster aquaculture with the health of the coastal marine environment. The three components include:

- Development of a focused education and training program for workforce development of the commercial oyster aquaculture industry. Funds would establish training programs for both hatchery operation and farm management.
- Integration of oyster aquaculture with ecosystem health. Funds would be used to develop aquaculture-based research programs, in hatcheries and on farms, and to enhance ecosystem services provided by oyster reefs through restoration and shoreline stabilization.
- Establish a comprehensive industry development plan for commercial oyster aquaculture creating a competitive edge for Texas oysters. Funds would be used to create a marketing plan for Texas oysters enabling our state to become an industry leader.

(3) (a) Major Accomplishments to Date:

N/A

(3) (b) Major Accomplishments Expected During the Next 2 Years:

- Training for fifty to two hundred practitioners and outreach programs for three to five thousand participants per year when fully staffed and operational.
- Initiation of hatchery, farming, and reef restoration research programs.
- Marketing plan and implementation initiated for industry, branding initiated.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

N/A

(5) Formula Funding:

N/A

(6) Category:

Public Service

(7) Transitional Funding:

N

760 Texas A&M University - Corpus Christi

(8) Non-General Revenue Sources of Funding:

Anticipating \$5.1M in RESTORE ACT

(9) Impact of Not Funding:

- Continued decline of Texas oyster yields (now at 50% of average).
- Further loss of the current \$70M in economic benefit to Texas represented by oysters.
- Increased pressure on the \$1B sport fish industry due to continued loss of reef habitat.
- Increased importation of oysters from other states (over 80% are currently imported).
- Continued decline of ecosystem services provided by oysters. Each acre of oyster reef provides \$30,000 in ecosystem services per year.
- Continued decline of working waterfronts, which provide access to the water and serve as recreational and commercial hubs for water-dependent activities, in Texas coastal communities.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

Permanent

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

This item will be reviewed every year to ensure they are generating an economic impact to the coastal economy.

760 Texas A&M University - Corpus Christi

Coastal Bend Economic Development and Business Innovation Center

(1) Year Non-Formula Support Item First Funded:	2010
Year Non-Formula Support Item Established:	2010
Original Appropriation:	\$500,000

(2) Mission:

The TAMU-CC Coastal Bend Business Innovation Center (CBBIC) supports economic development and job creation in Corpus Christi and surrounding rural communities. Our mission is two-fold: (1) providing business assistance to entrepreneurs at every level of development and (2) assisting rural community leaders in developing strategies to improve quality of services provided to residents, improve the climate for small businesses, and support overall economic development. CBBIC's Communities as a Start Up (CASU) initiative empowers communities to think with an entrepreneurial mindset. CBBIC offers client support services to startup businesses in the region that include access to business expertise and low-cost administrative services and office facilities. CBBIC also provides business education outreach workshops to assist start-ups or established businesses in better recognizing and fulfilling the needs and expectations of their customers.

With the impact of Hurricane Harvey in 2017 and COVID-19 beginning 2020, CBBIC is a strategic partner with the U.S. Economic Development Administration (EDA) to drive long-term economic recovery and resilience for South Texas. Given our mission to support startup businesses and rural communities struggling with economic development, it is essential that CBBIC funding be maintained at current levels.

(3) (a) Major Accomplishments to Date:

Since its inception in 2009, the CBBIC has served 193 resident clients, creating a cumulative total of 3,890 direct jobs.

Currently, the Center is home to 10 resident clients, 6 affiliate clients, and 18 graduates, generating 522 jobs, \$8.8 million in wage earnings, and approximately \$20 million in total business revenues annually.

CBBIC achieved our regional goal of economic diversification by incubating startups.

In addition to offering business services with subject matter experts from TAMU-CC, CBBIC strengthened the regional entrepreneurial ecosystem by delivering Lunch & Learn business education, outreach, and training for the Coastal Bend business community. CBBIC also collaborated with community stakeholders, including Buccaneer Days Commission, the Small Business Development Center, and the Small Business Administration (SBA).

CBBIC is designated by the EDA as a resource and coordination hub for implementing economic recovery functions for the Coastal Bend with government agencies. As a response to the COVID-19 pandemic, CBBIC expanded our mission and focused on the CASU initiative, and collaborated with EDA under the COVID-19 Emergency Relief Cares Act. This work will continue under the American Rescue Plan Act (ARPA) also funded by the EDA.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

760 Texas A&M University - Corpus Christi

In the next 2 years, CBBIC will continue to expand and improve our existing incubation and outreach services by:

- Generating at least 6 new clients per year.
- Offering at least 20 business educational workshops per year throughout the region
- Offering our workshop series "Doing Business with Giants" in corporation with Cheniere Energy to assist small businesses in securing partnerships with larger businesses. Those completing the workshop series will qualify for funding from Cheniere to enhance their business.
- Expanding service offerings from experts at TAMU-CC and other institutions, and through the South Texas Angel Network, SBA, and other sources.
- Continuing implementation of the CASU initiative in concert with the EDA under ARPA.
- Collaborating with federal, state and local government agencies as well as community stakeholders in developing and implementing business and community economic recovery and resilience plans to mitigate the impact of future disasters. In accordance with our mission, the center's key role in recovery and resilience focuses on assistance to small businesses as well as the business community at large.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

N/A

(5) Formula Funding:

N/A

(6) Category:

Public Service

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

1. EDA designation as a University Center provides \$112,850 through FY 2023.
2. Typically, program and usage fees from clients account for approximately \$30,000 of revenue per year. However, residential client fees were suspended from February 2020 to present due to COVID-19 to ameliorate the negative economic impact to our clients.
3. An EDA ARPA grant award will provide \$400,000 for the period of 2022-2025 to support the CASU initiative.

(9) Impact of Not Funding:

Without the funding from this non-formula support, CBBIC would not have sufficient funds to support current services and programs to support startups, entrepreneurship, and economic development in the Coastal Bend. The possibility of decreased support for startups and small businesses would negatively impact our regional economy.

CBBIC focuses on outcomes such as business success and job creation, allowing the Center to consistently exceed financial benchmarks. The business expertise provided by CBBIC fills a void in area communities that is necessary to support entrepreneurial new ventures, build robust economies and job markets in rural communities, and provide business education for area residents.

760 Texas A&M University - Corpus Christi

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

Permanent

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

Over the biennium, the Center served an average of 14 clients, created 243 direct jobs, and generated \$16 million in annual revenues and roughly \$6 million in annual salaries. In total, we served 193 small business clients, with 18 graduated firms. CBBIC successful completed 2 EDA grants and recently secured another.

760 Texas A&M University - Corpus Christi

Engineering Program

(1) Year Non-Formula Support Item First Funded:	2010
Year Non-Formula Support Item Established:	2010
Original Appropriation:	\$2,000,000

(2) Mission:

This funding develops and expands TAMU-CC's Mechanical Engineering (MEEN) and Electrical Engineering (EEEN) programs. This investment will:

- help address the critical shortage of Mechanical and Electrical Engineers in the region and state;
- increase the diversity of Mechanical and Electrical Engineering graduates;
- support associated activities that develop a robust pipeline of students prepared to enter and succeed in Mechanical and Electrical Engineering programs, and
- support existing university research focused on coastal resiliency and marine issues as well as autonomous, sustainable, and emerging technologies.

(3) (a) Major Accomplishments to Date:

Accomplishments include:

- MEEN program enrollment increased from 67 majors in 2009 to 266 majors in Fall 2021 (including pre-mechanical engineering), a 297% increase;
- EEEN program enrollment increased from 25 majors in 2015 to 87 majors in Fall 2021 (including pre-electrical engineering), a 248% increase;
- In Fall 2021, 49.9% of all Engineering students were Hispanic;
- Hispanic graduation rates for MEEN and EEEN are nearly 4 times the national average;
- TAMU-CC has graduated 538 MEEN and 59 EEEN majors;
- 83.5% of TAMU-CC Engineering graduates with known placement remained in Texas, contributing to the state workforce;
- TAMU-CC hosts annual STEM Summer Camps for middle and high school students;
- Federal grants from DoD, NSF, and other agencies: \$6.9 million on microfabrication, oil spill remediation, computational fluid dynamics, geospatial/environmental informatics;
- State and regional grants: \$1.2 million to address water quality, power plant cooling pipes, oil spills, and detection of cancer cells in blood flow;
- City of Corpus Christi Type A grants of \$2 million supporting mechanical and electrical engineering which helped fund a new engineering Lab (3,600 sqft instructional and 2,400 sqft research);
- Approval by THECB of a proposal for MS in Engineering program with "fast-track" five-year BS/MS option anticipated by end of 2022, and
- Mechanical engineering professor named a Distinguished Fellow by the United States DoD/Department of the Navy.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

760 Texas A&M University - Corpus Christi

Over the biennium, TAMU-CC will:

- Grow enrollments in Mechanical and Electrical Engineering with a focus on increasing diversity within the profession;
- Continue to expand our capacities in research and education in autonomous systems, to enrich student's learning experiences, and to expand the research enterprise;
- Contribute to technology development of autonomous systems, material surface characterization, and shear-resistant biofilms;
- Explore opportunities in subsea robotics, microfabrication, oil droplet dispersal technology, turbulent wall flows, the detection of circulating tumor cells through holographic interferometry, and support of emerging industries;
- Pursue external funding to upgrade the computing infrastructure and laboratory capabilities and maintain a state-of-the-technology learning environment for the students;
- Continue to pursue external funding for scholarships, including scholarship programs that support vertical integration of the STEM pipeline for high school students, veterans, and educators;
- Partner with community colleges and increase the number of articulation agreements;
- Increase the number and breadth of topics for summer camps in engineering for middle school and high school students, and
- Enhance student internships with industries in the area to provide additional opportunities for our students.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

N/A

(5) Formula Funding:

The formula funding generated from the MEEN and the EEEN courses amounted to approximately \$331,101 during the previous formula year (SU2020; FA2020; SP2021). Although the Engineering Program overall continues to gain momentum in the areas of faculty and student recruitment, as well as student success, Non-Formula Funding is a vital resource. Without this funding we would not be able to maintain a low student to faculty ratio or demonstrate the level of program support as required for ABET Accreditation. The MEEN and EEEN programs are aligned with the "Building a Talent Strong Texas" and represent an excellent return on investment to Texas taxpayers.

(6) Category:

Instructional Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

The market value of the Engineering-related endowment is \$6.06 million. The estimated distribution for scholarships in 2021-2022 totaled \$263,742.41. The total support for Engineering from the endowment, including the scholarships and the Benavides chair endowment, was \$301,742.41.

(9) Impact of Not Funding:

760 Texas A&M University - Corpus Christi

The Coastal Bend community strongly supports TAMU-CC's Mechanical and Electrical Engineering programs. The Non-Formula Support funding provides the ability to focus on the unique engineering needs in South Texas and the state, particularly for underrepresented populations. The funding also enables the mechanical and electrical engineering programs to expand our recruitment of STEM students, including summer camps for middle school students and high school students, as well as camps for future women engineers. Maintaining the engineering education contained in these programs is vital to closing the gap.

Failure to fund the TAMU-CC Engineering programs will significantly reduce, if not eliminate, our ability to grow and develop these programs. It will also hamper our ability to maintain our ABET-required faculty to student ratio. This funding allows the department to upgrade and expand instructional laboratory and shop capabilities, an especially critical activity in a rapidly growing field. Without the appropriation, we are greatly limited in our ability to recruit and hire new faculty and staff and to fund initiatives in the Mechanical and Electrical Engineering programs.

(10) Non-Formula Support Needed on Permanent Basis/Discontin

Permanent

(13) Performance Reviews:

TAMUCC internally reviews the Engineering Program's retention and graduation rates to ensure we are working toward the national average but also in support of the "Building a Talent Strong Texas" plan. The programs are also reviewed on a regular basis as required for ABET accreditation.

760 Texas A&M University - Corpus Christi

Environmental Learning Center

(1) Year Non-Formula Support Item First Funded:	2000
Year Non-Formula Support Item Established:	2000
Original Appropriation:	\$200,000

(2) Mission:

The mission of the Environmental Learning Center (ELC), along with the associated Aquatic Education Program (AEP), is to provide relevant scientific information about the coastal zone to K-12 students and the public through interactive programming. The main goals are to educate individuals about coastal ecosystems through field experiences and to encourage participants' understanding and appreciation of their natural surroundings.

The program continues to provide value-added service to TAMU-CC researchers, whose projects increasingly require an education and outreach component that engages with the public on scientific topics. We also support the educational and research needs of state and local government agencies. Funds are used for development and provision of educational activities focused on the ecology and history of the Texas coast. These efforts are simultaneously effective for satisfying sponsored funding requirements and for producing well-informed ecological stewards empowered with information to make sound environmental decisions in their communities. This program benefits statewide natural resources, enhances environmental education in the state, and assists TAMU-CC in recruiting STEM students.

(3) (a) Major Accomplishments to Date:

As an essential education and outreach feature TAMU-CC, the ELC conducts the following programs:

- Aquatic Education Program (formerly Adopt-A-Wetland Program initiated in 1994)
- Estes Education and Research Station (under reconstruction due to Hurricane Harvey)
- Laguna Madre Field Station for aquatic research
- Texas Terrapin Education and Research Program (TexasTERP)
- Artist in Residence Program (AiR), promoting STEAM integration (Science, Technology, Engineering, Arts, Math)
- Environmental studies/research by students and scientists throughout the Coastal Bend, providing vital community engagement

Each year, ELC also provides the following:

- Immersive educational experiences onboard the Wetland Explorer II to over 1200 K-12 students
- Public speaking events, reaching over 600 people

Our program additionally supports public education and ultimately environmental stewardship, which protects the natural resources and economy of Texas. Our work engages students and members of the public and promotes community awareness. It also creates opportunities for students, in their formative years, to consider STEM fields as career paths.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

760 Texas A&M University - Corpus Christi

During the next biennium, the ELC will continue its strong education/outreach mission through the AEP and the Artist in Residence Program. These programs educate our community on the Laguna Madre system, one of only 6 hypersaline lagoons in the world. They also showcase the beauty and ecological significance of South Texas, which serves as a valuable recruitment and outreach tool for TAMU-CC.

Through newly created programs, the ELC will expand resources and learning opportunities for K-12 teachers and students. We will develop partnerships with the Mission-Aransas National Estuarine Research Reserve managed by the University of Texas Marine Science Institute in Port Aransas and expand research experiences for undergraduates through the Laguna Madre Field Station. We will also recruit undergraduates to participate in coastal ecology research.

N

(8) Non-General Revenue Sources of Funding:

The ELC continues to diversify our non-general sources of support. These sources include local partnerships with organizations including the Coastal Bend Bays and Estuaries Program, the Texas State Aquarium, local non-profit foundations, and state agencies like the Texas General Land Office.

(9) Impact of Not Funding:

Failure to fund this item would result in the loss of significant education, training, and coastal awareness resources in Texas. Annually, thousands of young adults would not learn about the coastal environment. Based on past estimates of former students assuming teaching roles, and the multiplier effect trained teachers have, thousands of individuals would not have access to the environmental stewardship benefits of this unique program. To satisfy sponsored research outreach requirements, TAMU-CC researchers would need to take on significant additional work. Additionally, TAMU-CC would lose a valuable recruitment tool, to the detriment of overall enrollment. The net result of a failure to fund this item would be a substantial reduction in our services to South Texas.

Gulf of Mexico Environment Research Laboratory

(1) Year Non-Formula Support Item First Funded:	2002
Year Non-Formula Support Item Established:	2002
Original Appropriation:	\$300,000

(2) Mission:

The primary goal of the Gulf of Mexico Environmental Research Laboratory (GEMRL) at TAMU-CC's Harte Research Institute for Gulf of Mexico Studies (HRI) is the development of a premier marine research institute focused on the Gulf of Mexico. GEMRL provides the mechanism to expand and propel Texas into a premier role in marine sciences. Building on TAMU-CC's strengths in ocean observation, GIS, and applied coastal and marine studies, GEMRL broadens cooperation and application of research efforts with academia, industry, and the military to provide real-world solutions, including pressing coastal and marine issues like responding to natural and manmade disasters. The interdisciplinary design of TAMU-CC's HRI makes it a recognized leader in the community of marine science institutes. Through local, state, national, and international collaboration, HRI addresses ecosystem scale problems and promotes the concept people and the environment are inexorably linked in their solution.

(3) (a) Major Accomplishments to Date:

GEMRL provides a transparent, collaborative venue, bringing together diverse stakeholders and partners. We offer a foundation to train and empower students as the next generation of leaders, entrepreneurs, and innovators in advancing a sustainable Gulf of Mexico.

- Since 2001 HRI received over \$98M in federal, state, and private funds.
- Educated over 150 graduate students and future leaders.
- Completion of the Texas Coast Ecosystem Health Report Card (RC)- Coastal Texas and its watersheds provide an excellent model of the entire Gulf of Mexico because of the diversity and complexity of its ecosystems, human communities, and associated environmental stressors. The Texas Gulf RC utilized seagrasses, oyster reefs, birds, water quality, and fisheries. The RC is an objective process for citizens, managers, policymakers and scientists. The RC helps focus investment that is beneficial for communities, economies, and the coastal ecosystem.
- Over 24 acres of oyster reefs have been restored, producing over 10M new oysters, filtering over 270M gallons of water a day. The estimated value of oysters ranges from \$2k-40k/acre and as high as \$23k/acre for recreational angling.
- Initiated the Colony Island Network Design and Implementation to Recover Waterbirds in the Gulf of Mexico, creating a geographic information system to advise which islands should be created or rehabilitated for maximum conservation benefit.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

760 Texas A&M University - Corpus Christi

GMERL funding assists HRI experts in their work with coastal counties to improve community resilience in response to natural and manmade disasters. Grant funding application assistance, economic analysis, GIS mapping, and other technical resources are made available from these funds. GMERL funding is also used to increase the preparedness of local and regional officials, in partnership with private industry, to collectively anticipate risk, evaluate how that risk can impact key economic assets, and build a responsive capacity. City and county governments, especially in rural areas, often lack capacity to fully take advantage of various funding sources for disaster recovery and mitigation. GMERL funding allows HRI to work with the Texas Division of Emergency Management to develop response and recovery capabilities while mitigating future disaster risk.

Over the next biennium, the region will continue to benefit from the \$18 billion in restoration funding from the Deepwater Horizon Oil Spill settlement. Texas One Gulf Center of Excellence, led by the TAMU-CC's HRI, focuses on sustainability of an economically and environmentally healthy, productive Texas coast. GMERL funding provides resources to continue to access these funds and direct them to areas of the state with the greatest need.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

N/A

(5) Formula Funding:

N/A

(6) Category:

Research Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Over the biennium, HRI expects to maintain current levels of funding by maximizing efficiency of existing resources through partnerships with local industry. HRI has the potential to generate greater revenues and advance important research goals thanks to GMERL funding. The funding also shows the dedication of the state to the research HRI conducts, further aiding efforts to attract additional funds from diverse sources.

(9) Impact of Not Funding:

If GMERL funding is reduced or eliminated, coastal counties and community capacity to respond to and recover from both manmade and natural disasters will remain limited. HRI will not have the resources to bring the best available science to local partners and communities to assist in response and recovery, especially underserved and rural areas, which often lack both the resources needed to build resilience. Coastal communities and counties will be less prepared to mitigate and recover from disasters and more vulnerable to adverse effects and long-term impacts of disasters.

HRI will not be able to sustain graduate student training and the two PhD Programs (Coastal and Marine Systems Science and Marine Biology) will be reduced to four students. The more funding that HRI can provide for students' research costs, the less debt they will incur, aiding statewide efforts on higher education affordability. Finally, this item provides TAMU-CC the opportunity to maximize resources to secure additional federal, state, and private sources of revenue.

Institutional Enhancement

(1) Year Non-Formula Support Item First Funded:	2000
Year Non-Formula Support Item Established:	2000
Original Appropriation:	\$6,819,427

(2) Mission:

The mission for the Institutional Enhancement (IE) Non-Formula Support is to supplement the institution's base funding to support core academic operations. In addition, this funding provides the university with the financial support necessary to provide students with top-tier faculty who play a critical role in closing the educational gaps which exist in South Texas. A significant portion of these funds are dedicated to enhancing student support services. These services focus on retention efforts such as the First-Year Learning Communities Program, the Centers for Academic Success and Advising, Core Curriculum activities, additional student academic scholarships, and targeted recruitment efforts, all of which have a significant impact on TAMU-CC doing its part to ensure Texas achieves its "Building a Talent Strong Texas" education goals. The university, through this item, continues to make progress toward closing the gaps for success for the Hispanic community in higher education. In TAMU-CC's strategic plan, the university has targeted enrollment growth and increasing the educational attainment of a historically underserved region as a high priority.

(3) (a) Major Accomplishments to Date:

Major accomplishments of TAMU-CC Institutional Enhancement include:

- TAMU-CC enrollments, and particularly traditionally underrepresented populations' enrollments, have increased significantly from 2002-2021:
 - o Overall enrollment increased 41.5%
 - o Hispanic enrollment increased 86.5%
 - o Hispanics represent 47.9% of enrollment
 - o African-Americans represent 4.9% of enrollment
 - o Other Minorities and/or multi-racial students represent 7.6%
- TAMU-CC exceeded Closing the Gaps goals for total enrollment as well as African-American and Hispanic enrollment by fall 2021
- TAMU-CC degrees awarded have increased 111.0% from FY2000 to FY2021.
- Of the 2,768 TAMU-CC degrees awarded in FY 2021, 52.8% were to first generation college students and 53.3% were to minorities. Both achievements are significant contributions to Closing the Gaps goals for student success.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Over the biennium, continued funding for Institutional Enhancement will allow TAMU-CC to further the significant progress made to date in enrollment and degrees awarded specifically to underrepresented populations, initially through the South Texas Border Initiative and, subsequently, through this Institutional Enhancement funding. Raising the educational attainment of South Texas will also improve the social and economic outlook for the region and all of Texas.

760 Texas A&M University - Corpus Christi

Lone Star Unmanned Aircraft Systems Center & Emergency Management

(1) Year Non-Formula Support Item First Funded: 2018
Year Non-Formula Support Item Established: 2013
Original Appropriation: \$3,500,000

(2) Mission:

Lone Star Unmanned Aircraft System Center (LSUASC) and its Emergency Management program advance the integration of UAS and Autonomous Aviation (AAV) technologies across educational, public, and commercial agency interests; provide economic stimulus by attracting industry partners to Texas; inform governing agencies on UAS and AAV operations in the National Airspace System; integrate UAS into Texas Division of Emergency Management (TDEM) and disaster resiliency plan for Texas, beginning in the coastal region. LSUASC prepares participants for jobs requiring UAS ability and provides opportunities in STEM fields to Hispanic, first-generation, and low-income students.

The appropriation allows:

- Advances in UAS and AAV technology integration across educational and government agencies including emergency & disaster response teams
- Provision of advanced autonomous vehicle services, systems monitoring, operations support, live virtual and constructive simulation, and test /validation capabilities to LSUASC and TAMUCC
- Partnership continuation between the FAA and LSUASC for the development of a Beyond Visual Line of Sight (BVLOS) state-wide authorization to further UAS and AAV experimentation, safety, and integration
- Sustaining partnerships with state and local agencies across Texas in the design, construction, and execution of standardization and certification programs for a variety of public safety entities such as first responders and disaster response personnel to name a few

(3) (a) Major Accomplishments to Date:

- Awarded over \$20M in federal, state, private contracts
- Completed a 2.5-year, \$3.2M FAA Next-Gen Office project, tested and evaluated operational concept for integrating large drones and manned aircraft safely into National Airspace System; launched a 5-year, non-reimbursable Space Act Agreement with NASA supporting Advanced Air Mobility common research; completed 42 NDAs with prospective UAS research and industry partners
- Completed a \$4.8M research effort supporting package delivery for a Fortune 100 retail sector partner
- Completed a 5-year, \$3.6M NASA UAS Traffic Management testing and evaluation study
- Collaborated with high schools on UAS/STEM education
- Support during Waverly Floods, Hurricanes Harvey and Hanna, including Aransas County Search, Rescue, and Recovery; survey of Port of Corpus Christi & Shipping Channel, West Houston and Port Mansfield; TX GLO oil platforms survey; Bob Hall Pier survey
- Provided prototype technology & support directly to Corpus Christi Fire and Police Departments, created integrated situational pictures for all participating agency's operations
- Developed partnership with TDEM Region 3 aimed to achieve a UAS Response Team designation from TDEM
- Developed a shared airspace framework for use in complex manned-unmanned operations during emergency response situations. Engaged in discussions with CC International Airport Air Traffic Control, US Navy, and US Coast Guard on implementing this shared airspace approach

760 Texas A&M University - Corpus Christi

(3) (b) Major Accomplishments Expected During the Next 2 Years:

- Expand initial capabilities supporting BVLOS operations in South Texas
- Demonstrate ability to conduct routine operations with large UAS about 400 feet above ground level, attracting industry partners to conduct research with LSUASC and implement the shared airspace framework for use in complex manned-unmanned operations during emergency response situations
- Develop proofs of concept for autonomous aviation operations; acquire or develop new capabilities, technologies and platforms to implement AAV concepts
- Provide initial capabilities to support advanced autonomous vehicle services, systems monitoring, operations, live virtual and constructive simulation, and test/validation capabilities
- Implement the shared airspace framework for use in complex manned-unmanned operations during emergency response situations
- Further R&D of airborne detection and avoidance systems that enable multiple aircraft to safely and simultaneously operate in a congested environment to maximize search and rescue efforts
- Promote South Texas as a hub for UAS material research, electronic integration, manufacturing, and technology by leveraging partnerships with original equipment manufacturers, local communities, economic development entities and the Coastal Bend Business Innovation Center
- Expand our partnership with Del Mar Community College, high schools, and state-wide STEM organizations to promote UAS workforce development through internships, community outreach and course development

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

Prior funding sources include the City of Corpus Christi, State, Federal and private sector grants and contracts.

(5) Formula Funding:

N/A

(6) Category:

Research Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Since 2016, LSUASC has conducted over \$16M in UAS research for federal and private entities and \$4M from the Corpus Christi Regional Economic Development Corp. to conduct BVLOS Airspace study, develop guidance to implement findings, develop state-of-the-art MCC to support routine BVLOS operations. This totals over \$20M in non-general revenue funding.

(9) Impact of Not Funding:

760 Texas A&M University - Corpus Christi

Limit LSUASC's ability to serve federal, state, and private entities, Texas workforce and TAMUCC's academic and research mission and commitment to student success through:

- Reducing ability to conduct routine, safe, large UAS operations within a BVLOS environment and test site's UAS integration in Texas
- Limiting economic growth in the Coastal Bend Region and across Texas
- Decreasing Texas' economic advantages, capitalization on prior significant investments, and disaster response exercises and training
- Delaying FAA and FCC assistance in building state-wide BVLOS and communications technologies
- Diminishing South Texas' recognition as a hub for UAS and Autonomous Aviation
- Failing to make Texas the first in the nation and a leader for offshore package delivery and urban air mobility capability
- Losing partnerships and research with FAA and NASA in implementing the Advanced Air Mobility concepts
- Lessening investment in UAS infrastructure and capability to be more appealing to external funding opportunities
- Reducing UAS research collaboration with the research community and preparation for students to be leaders in UAS jobs
- Eliminating an internship program with full potential to move its students toward incredible opportunities with industry and government agencies requiring UAS expertise

(10) Non-Formula Support Needed on Permanent Basis/Discontin

Permanent

The Lone Star Unmanned Aircraft Systems Center is internally and annually reviewed on its effective response in using UAS in disaster relief, the integration of UAS in Texas skies, and the economic impact of the Coastal Bend region.

760 Texas A&M University - Corpus Christi

National Spill Control School Expansion

(1) Year Non-Formula Support Item First Funded:	2024
Year Non-Formula Support Item Established:	1977
Original Appropriation:	\$1,300,000

(2) Mission:

Texas is experiencing rapid growth in production and transportation of oil & gas along its coast. There is an increased demand for training of offshore oil spill response personnel. Local community emergency managers and state agency personnel understanding offshore spill operations will increase the response effectiveness in a Deepwater Horizon spill-like event. On June 3, 1979, a 2 mile deep exploratory well, IXTOC I, blew out in the Bahia de Campeche, 600 miles south of Texas in the Gulf of Mexico. Crude oil coated South Texas beaches, marinas, and resulted in significant impact to wildlife. New offshore three-day spill courses would encompass classroom theory instruction, but more importantly, students would get underway to observe large skimming vessel operations.

- The National Spill Control School (NSCS) at TAMU-CC was established in 1977 and serves as a consulting, training, and research resource.
- Expanding NSCS will increase the number of response courses offered as Texas increases its oil exports; an exceptional investment by the State of Texas to protect its coastline, beaches, and other vital infrastructure.
- With this funding, NSCS will provide mandatory training to other state agencies, such as Texas EOC, various county EOC's and other Emergency Management teams. NSCS would hold monthly courses where students would use spill response equipment to experience boom deployment, skimmer operations and other critical response tasks.

(3) (a) Major Accomplishments to Date:

The National Spill Control has provided inshore oil spill courses since 1997. The courses for government, industry, and university students are paid for by course fees. 300 plus students complete an oil or hazardous substance awareness course annually. The school has seen a reduction in requests for courses by large organizations over the last 20 years, which was compounded due to COVID. The current \$150,000 budget target from course fees has not been met numerous times over the last 10 years. As a result, minimal funds are available for proper maintenance of two existing small boats and trailers. The NSCS has had interest in doing offshore spill response training. Unfortunately, these courses require using large vessels, people, and equipment which are only funded for periodic deployments to meet minimum regulatory requirements instead of monthly training courses proposed in the LAR for county and state agencies employees, and third party organizations.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

- Establish both nearshore and offshore oil spill training for Texas, state agencies, university students, industry, and community stakeholders. Currently NSCS is only able to offer onshore spill training.
- Increase the NSCS's oil spill onshore training capability by acquiring two new boats, trailers, and towing vehicles. Currently, the Spill School has no towing vehicles and one boat that was donated with significant maintenance issues.
- Increase the number of personnel trained in oil spill control including state agency personnel, municipal governments, and local businesses.
- Increase the number of support hours the NSCS provides to the South Texas Coastal Area Committee, the main spill preparedness group for the Coastal Bend.
- Increase support hours that the NSCS team provides for oil spill exercise support and evaluation to POCCA.

760 Texas A&M University - Corpus Christi

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

N/A

(5) Formula Funding:

N/A

(6) Category:

Public Service

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Most of the spill training proposed in the LAR is not currently funded and being conducted. Most county and other state coastal emergency managers have not had exposure to coastal and offshore oil spill response resources. Worst case discharge exercises by operators in the Gulf are only required every three years. However, county and other state agencies will be represented at many organizational levels in an incident providing input or making decisions without having knowledge of offshore spill equipment limitations, weather impacts, and volume of oil collected capabilities. The Deepwater Horizon incident was a mass mobilization of area resources and for many in the response organization, it was a learn as you go experience, instead of being truly prepared. Asking the questions before the spill like should we use fire boom to burn the oil, how is fire boom different from skimming boom, what are the tradeoffs over mechanical recovery with skimmers, and on and on will ensure county and state employees make efficient initial decisions in a large spill scenario.

(9) Impact of Not Funding:

- Loss of potential funding for the NSCS will mean that current government, industry, and university students will continue to use old spill equipment, outdated class room teaching technology, main classroom engineering modifications not being made to fix the air conditioning system, and dependence on old boats that break down routinely.
- New coastal and offshore spill training courses will not be initiated for the Port of Corpus that is the leading export of oil in the United States , and a state as a whole, with one of the largest offshore production capacities and expansive shorelines and wetlands vulnerable to large oil spills .
- Texas depends on offshore exploration and coastal terminals as a major economic engine for the entire state, nation, and the world. To ensure the sustainability of this vital industry and support health and safety, appropriate training is necessary to avoid and mitigate any potential spills.
- The Texas coast is home to the nation's largest petrochemical complex and the country's second most productive estuaries for commercial fishing. The growth of POCCA oil exports and growth in Mexico's offshore oil exploration near the US border has increased the potential for a spill that could impact the entire Gulf Coast .

(10) Non-Formula Support Needed on Permanent Basis/Discontin

This item will be reviewed every year to ensure we generate an economic impact for the coastal economy.

760 Texas A&M University - Corpus Christi

School Nursing Program for Early Childhood Development Center

(1) Year Non-Formula Support Item First Funded:	1998
Year Non-Formula Support Item Established:	1998
Original Appropriation:	\$250,000

(2) Mission:

The mission of the TAMU-CC Blanche Davis Moore Early Childhood Development Center (ECDC) is to serve as a comprehensive educational & research facility for early childhood education. The ECDC supports a partnership between TAMU-CC's College of Education & Human Development & Corpus Christi Independent School District (CCISD) & also serves as a hub for early childhood development training & research across the Coastal Bend region. The partnership focuses on equitable education, instructional excellence, & collaborative services for CCISD students, teachers, administrators, parents & TAMU-CC university students. Beginning in Fall 2023, the ECDC will serve as a pre-Kindergarten elementary school for 4 year-old's (PK-4) under eligibility requirements in Texas Education Code §29.153.

The ECDC serves as a clinical preparation setting for TAMU-CC early childhood education & nursing students & is designed for direct instruction, health/wellness evaluation, co-teaching, observation, & teacher preparation assessment. Clinical experience is a key component in preparation of TAMU-CC students studying early childhood & elementary education as well as nursing, health sciences, & counseling. TAMU-CC students benefit from this partnership through training on early childhood education programming & research. The ECDC students & faculty also benefit from access to university facilities, providing innovative programming & a variety of educational experiences.

(3) (a) Major Accomplishments to Date:

The successful partnership between TAMU-CC & CCISD provides students studying to be early childhood educators & nurses a high-quality clinical experience. The ECDC's recent awards related to academic & student achievement include:

- 2018-2019, ECDC received "A" ratings in student achievement, student progress, & closing performance gaps with Distinction Designations in Academic Achievement in Science & English Language Arts/Reading, & Top 25% Comparative Academic Growth.
- 2019-2020, ECDC received "A" ratings in student achievement, student progress, & reduction in achievement gaps.
- 2020-2021, ECDC was recognized by Governor Abbott as a National Blue Ribbon School based on overall academic performance or progress in closing achievement gaps

Over the past year, significant collaboration between TAMU-CC & CCISD examined the possibilities to align the partnership with HB3, requiring school districts to provide full-day pre-kindergarten. The review process also considered the growing need for high-quality & innovative early childhood teacher preparation programs in the Coastal Bend.

Further, the ECDC was awarded a three-year \$300,000 grant from University School Partnerships for the Renewal of Educator Preparation to commence a 1 year clinical residency program for the preparation & development of high-quality & innovative early childhood teachers. The program prepares new pre-k teachers to fill vacancies & meet area school district needs over the next 3 years.

760 Texas A&M University - Corpus Christi

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Over the next 2 years, the ECDC will strive to be a statewide & national model for how intentional & well-designed university-school district partnerships can improve academic, social-behavioral, & health/wellness outcomes for high-need early childhood students. The ECDC will accomplish this through comprehensive high-quality & evidence-based teaching, learning, & research efforts in the PK-4 classrooms as well as ongoing preparation of future educators & healthcare professionals. The ECDC will also incorporate wellness initiatives & parenting programs & unique environmental & experiential education activities into the ECDC outdoor areas.

Student engagement at the ECDC will expand through diverse teaching & learning strategies to include enhanced technology for learning, art integration, & health & physical education. The new focus on PK-4 will also provide opportunities to bring nationally recognized guest speakers as well as serve as a site for local, regional, & statewide conferences. It will be a Texas grown model for creativity, innovation, & culturally responsive learning that is unparalleled in the Coastal Bend region.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

Funding for program did not exist prior to non-formula support. State Funding was provided for the building.

(5) Formula Funding:

N/A

(6) Category:

Instructional Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

N/A

(9) Impact of Not Funding:

The ECDC students would experience a negative impact around screening & treatment services available from TAMU-CC nursing students. Additionally, it would negatively impact growth toward effectively meeting ECDC student & family needs associated with the social determinants of health & wellness in the target population. There would also be inadequate support for ongoing training & development of TAMU-CC nursing students.

Another negative consequence would be elimination of key elements of the curriculum, research, & services provided by TAMU-CC students & faculty to the CCISD students & families. For example, support for behavioral health needs of students will decrease. Students with special mental or physical needs are less likely to receive the additional support needed to be successful. Further, lack of funding reduces the number of highly qualified teachers & nurses in the employment pipeline to meet the demands of the early childhood education & healthcare across South Texas.

Water Resources Center

(1) Year Non-Formula Support Item First Funded:	1992
Year Non-Formula Support Item Established:	1992
Original Appropriation:	\$75,000

(2) Mission:

The mission of The Center for Water Supply Studies (CWSS) at TAMU-CC is to address water supply issues in South Texas by conducting relevant research, disseminating information via partnerships with local, state and federal agencies, and evaluating resource management strategies. This research impacts water quality/quantity in reservoirs, rivers, bays, estuaries, and aquifers, and educates citizens in understanding water supply issues, and develops synergy between other institutions of higher education and CWSS.

CWSS is committed to:

- conducting research on surface water systems and on subsurface aquifer characterization and stratigraphic complexity through quality data collection and modeling;
- assessing management strategies for maintaining water quality and quantity while balancing conservation and resource needs;
- compiling, analyzing and disseminating data gathered by the CWSS and partner agencies, and
- supporting TAMU-CC's research and education goals as well as our commitment to public service.

CWSS integrates our research with the mission of TAMU-CC and the Momentum 2020 Strategic Plan by enhancing the practical experience of undergraduate and graduate students at the convergence of a variety of disciplines and marketable skills. The CWSS mission directly aligns with the "Building a Talent Strong Texas" plan.

(3) (a) Major Accomplishments to Date:

CWSS's funding has significantly enhanced the education and marketable skills of students through exposure to state-of-the-art facilities, equipment and software, and field and laboratory experiences. CWSS students continue into advanced degree programs or enter the job market as professionals in the environmental and/or energy industries. CWSS compiles and analyzes water-related data gathered by local, state, and federal agencies and serves as an information source on the impact of alternative water management strategies, including reservoir operations and wastewater treatment, on regional rivers, bays, and estuaries.

Externally funded projects total over \$4M over the biennium. CWSS work includes assessments of septic system vulnerability along the Gulf of Mexico coast and evaluation of bacteria and nutrient loading in relation to coastal resilience evaluations addressing the SB3 Environmental Flows Process. It further addresses pressing coastal resilience issues related to algae blooms and associated economic losses. Pollutant source tracking also meets the Texas Coastal Resiliency Master Plan priority issues "Impact on Water Quality and Quantity" and "Impact on Coastal Resources." It also supports the goals of the Coastal Zone Act Reauthorization Amendments to "protect coastal waters" by "control" of nonpoint source pollution. The NSF's Stakeholder-Guided Environmental Science brings \$2M in funding to train graduate students in research guided by stakeholder needs.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

760 Texas A&M University - Corpus Christi

Key accomplishments over the next biennium include:

- Continuing dynamic research related to the priorities of SB3 environmental inflows and habitat resiliency, the Texas Coastal Resiliency Master Plan, and the Coastal Zone Act Reauthorization Amendments;
- Publishing for the citizens of Texas and regulatory agencies research related to water resources for informed and improved water management and policies such as nutrient and freshwater inflow criteria;
- Examining low-income communities' resiliency in the face of extreme weather events such as hurricanes and flooding as related to sources of water (i.e. contamination of water resources and alternative resources);
- Continuing education for students and the public on water-related topics;
- Continuing to enhance the practical experience of undergraduate and graduate students at the confluence of a variety of disciplines and marketable skills in support of the educational and research mission of CWSS, TAMU-CC, and the "Building a Talent Strong Texas" plan;
- Developing, in accordance with the current projected changes related to water resources, a plan for NSF's RAPID solutions to understand and improve capacity to prepare for, respond to, and recover from emergent environmental concerns at all levels - local, regional, state, and national.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

N/A

(5) Formula Funding:

N/A

(6) Category:

Public Service

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

The CWSS currently averages an estimated 50:1 funding leverage in external grants and contracts, biennially bringing in over \$4M of outside support to supplement our Non-Formula Funding.

(9) Impact of Not Funding:

760 Texas A&M University - Corpus Christi

If not funded, CWSS's role in education and research will not be maintained. It will jeopardize external funding and reduce our capacity to engage in public service. Since the center's inception, more than 150 students have worked on center projects and used equipment purchased by the center. Many of these students have been first generation and/or from traditional underrepresented groups. Any loss in Non-Formula Funding will restrict or eliminate the exploratory component of CWSS available to students and the community.

Further, the center's funding has significantly enhanced the educational experience of students through exposure to state-of-the-art equipment and software. For instance, the center supported the undergraduate programs in geology, environmental sciences (ESCI), and chemistry by including undergraduate students in the center's research projects as part of sponsored projects or supported through CWSS and undergraduate scholarships. The center also participates in student recruitment efforts for the geology, ESCI, and coastal and marine system science programs. The center provides students with hands-on experience prior to entering the job market, enhancing their employability.
