Raymund A. Paredes, COMMISSIONER OF HIGHER EDUCATION

### **Mission of the Coordinating Board**

The Texas Higher Education Coordinating Board's mission is to work with the Legislature, Governor, governing boards, higher education institutions, and other entities to help Texas meet the goals of the state's higher education plan, *Closing the Gaps by 2015*, and thereby provide the people of Texas the widest access to higher education of the highest quality in the most efficient manner.

### **Philosophy of the Coordinating Board**

The Texas Higher Education Coordinating Board will promote access to quality higher education across the state with the conviction that access without quality is mediocrity and that quality without access is unacceptable. The Board will be open, ethical, responsive, and committed to public service. The Board will approach its work with a sense of purpose and responsibility to the people of Texas and is committed to the best use of public monies. The Coordinating Board will engage in actions that add value to Texas and to higher education. The agency will avoid efforts that do not add value or that are duplicated by other entities.

The Texas Higher Education Coordinating Board does not discriminate on the basis of race, color, national origin, gender, religion, age, or disability in employment or the provision of services.

## Summary

Texas Education Code, Section 61.0582, directs the Texas Higher Education Coordinating Board (THECB) to collect information on deferred maintenance needs of public institutions of higher education (not including community colleges). These data are collected annually by means of the following Master Plan (MP) reports:

- The MP2 identifies current accumulated deferred maintenance (ADM) needs and lists projects planned to address accumulated deferred maintenance needs in the next five years.
- The MP4 lists actual expenditures for ADM in the most recent fiscal year.

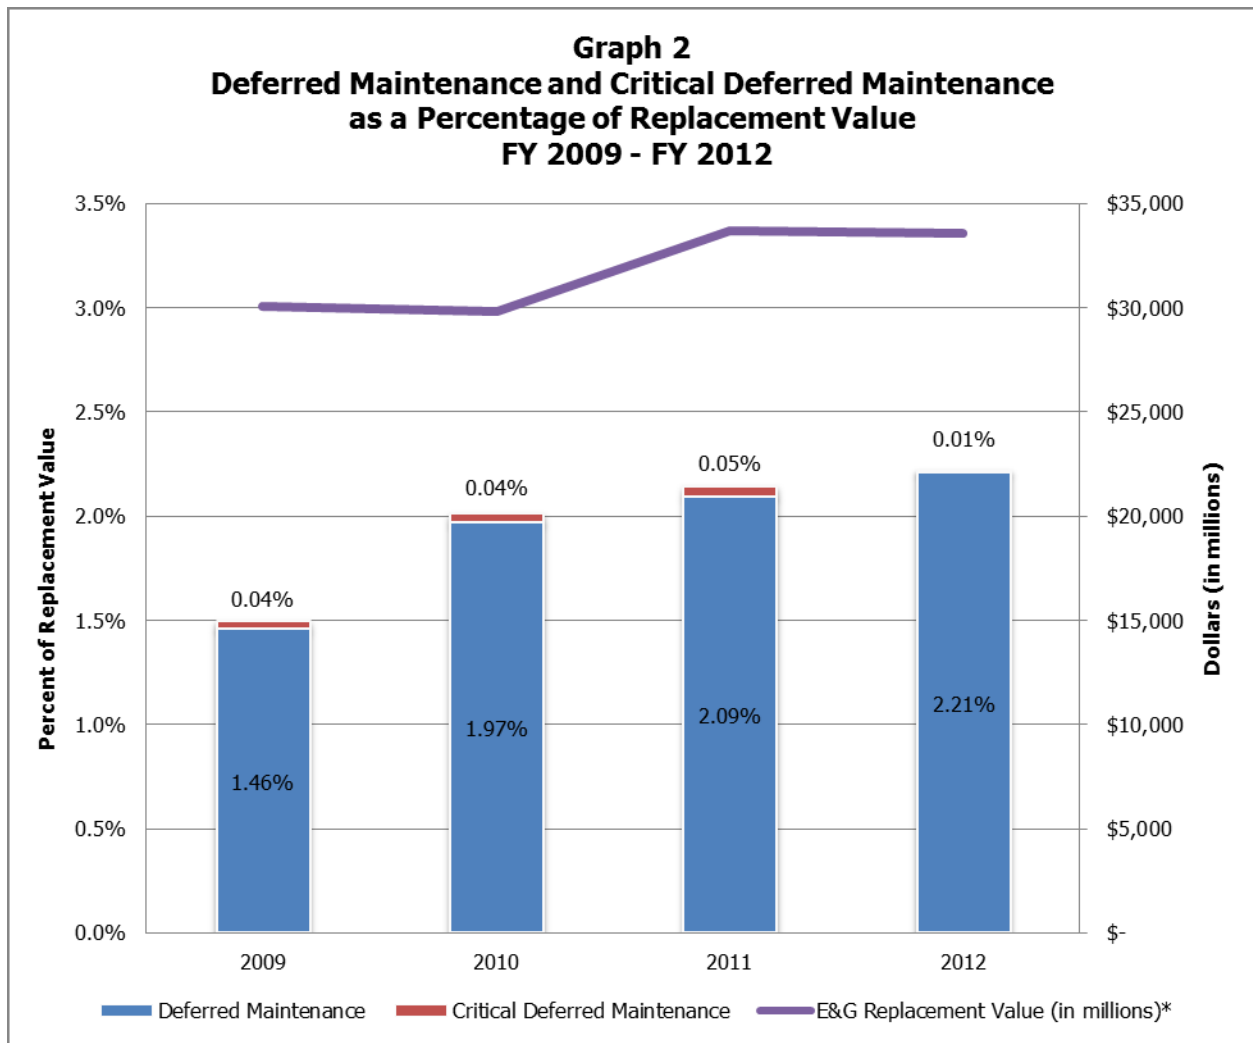

The following information summarizes MP2 and MP4 data submitted to the THECB in October 2011 and covers the deferred maintenance plans for Fiscal Years (FY) 2012 – 2016 and actual expenditures made in FY 2011.

Graph 1 displays the projected expenditures for ADM for FY 2012 – 2016, which totaled \$744.1 million, up 3.2 percent from the \$721.2 million reported for FY 2011 and up 24.3 percent from FY 2010.

Source: MP2 reports for FY 2009 - FY 2012. See Table 1, *MP2 Summary, Projected Deferred Maintenance Expenditures by Year*, reported fall 2011.

The bars in Graph 2 represent ADM over the past four years, and the line represents the overall Educational and General (E&G) replacement value. The FY 2012 E&G replacement value appears to have decreased 0.3 percent from FY 2011, however, as footnoted; **the methodology to calculate replacement value has changed** and therefore has limited comparative value. In fact, the old calculation methodology would have yielded a 2.97 percent decrease in replacement value. The base rate of the 10 latest projects increased 3 percent, from \$285 per square foot to \$292 per square foot. The amount of ADM increased 6 percent, from \$700 million for FY 2011 to \$740 million in FY 2012. Critical deferred maintenance (CDM) increased from \$16 million in FY 2011 to \$1.8 million in FY 2012, resulting in a 0.01 percent ratio of CDM to E&G replacement value for FY 2012.

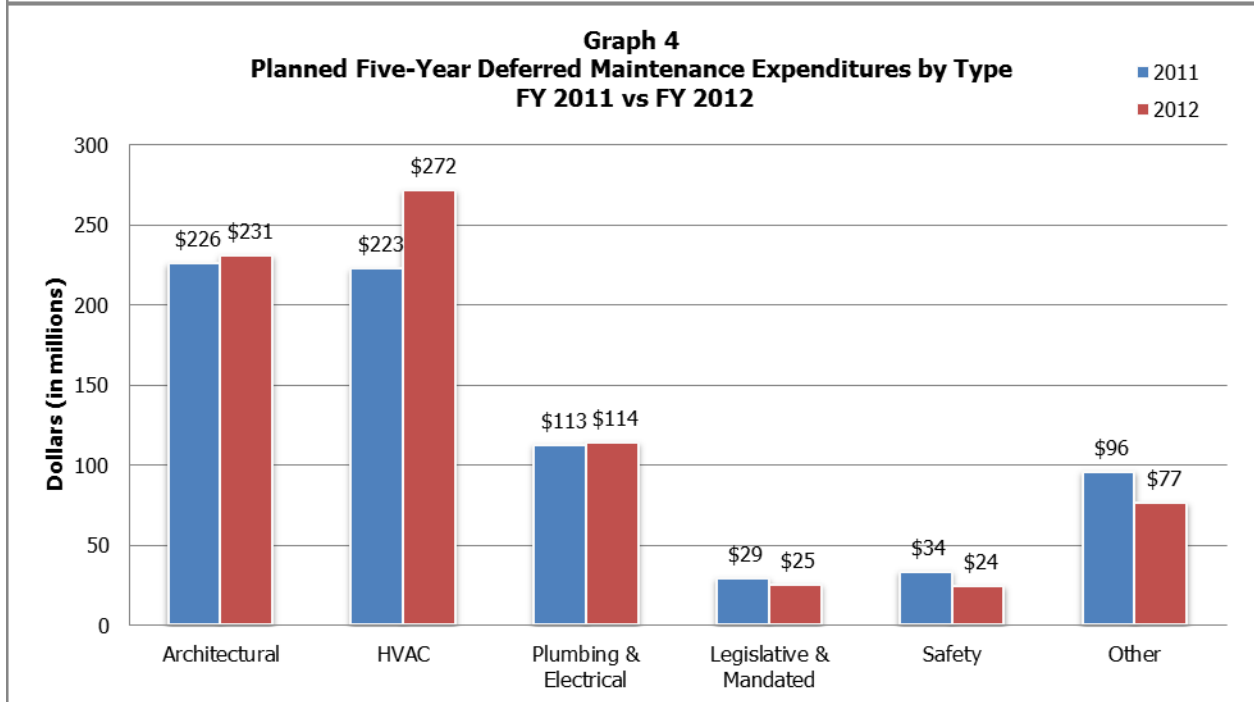

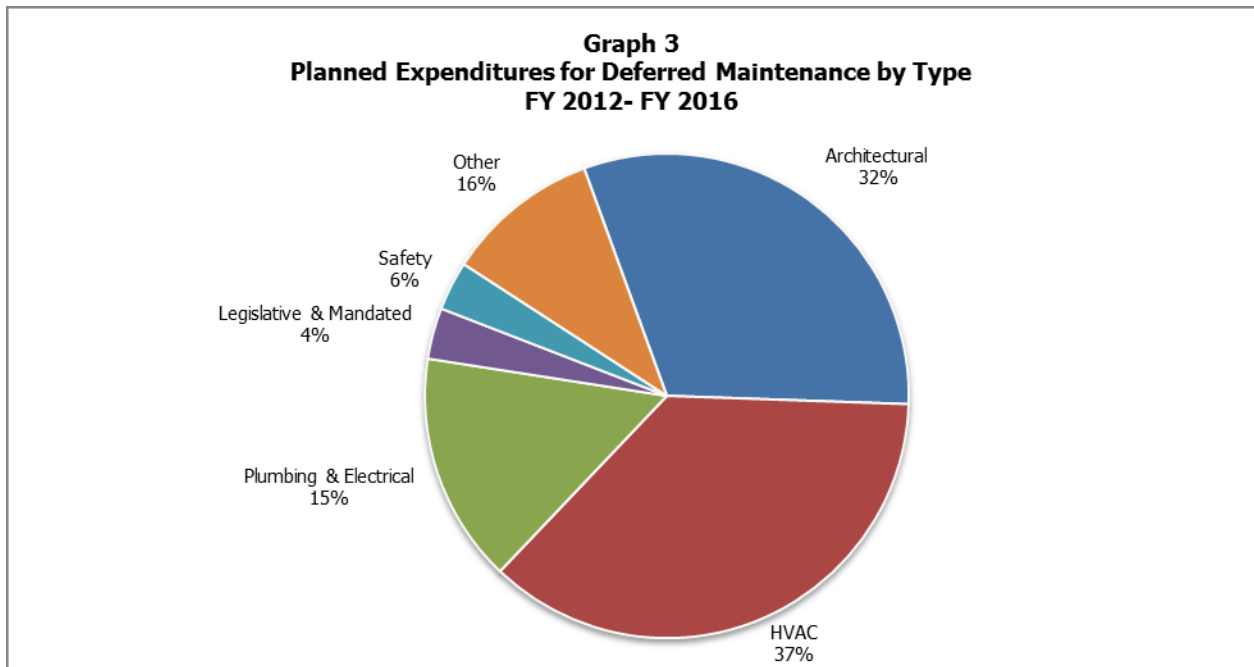

\*The methodology for the 2011 E&G Replacement Value has changed as a result of the 2010 Deferred Maintenance Workgroup and will be referred to as the Campus Condition Index Value with the next reporting cycle.

Source: Deferred & Critical Deferred Maintenance as a Percentage of Replacement Value reports for FY 2009 – FY 2012. See Table 2, *Deferred Maintenance to Campus Condition Index Value Summary - Fall 2011*.

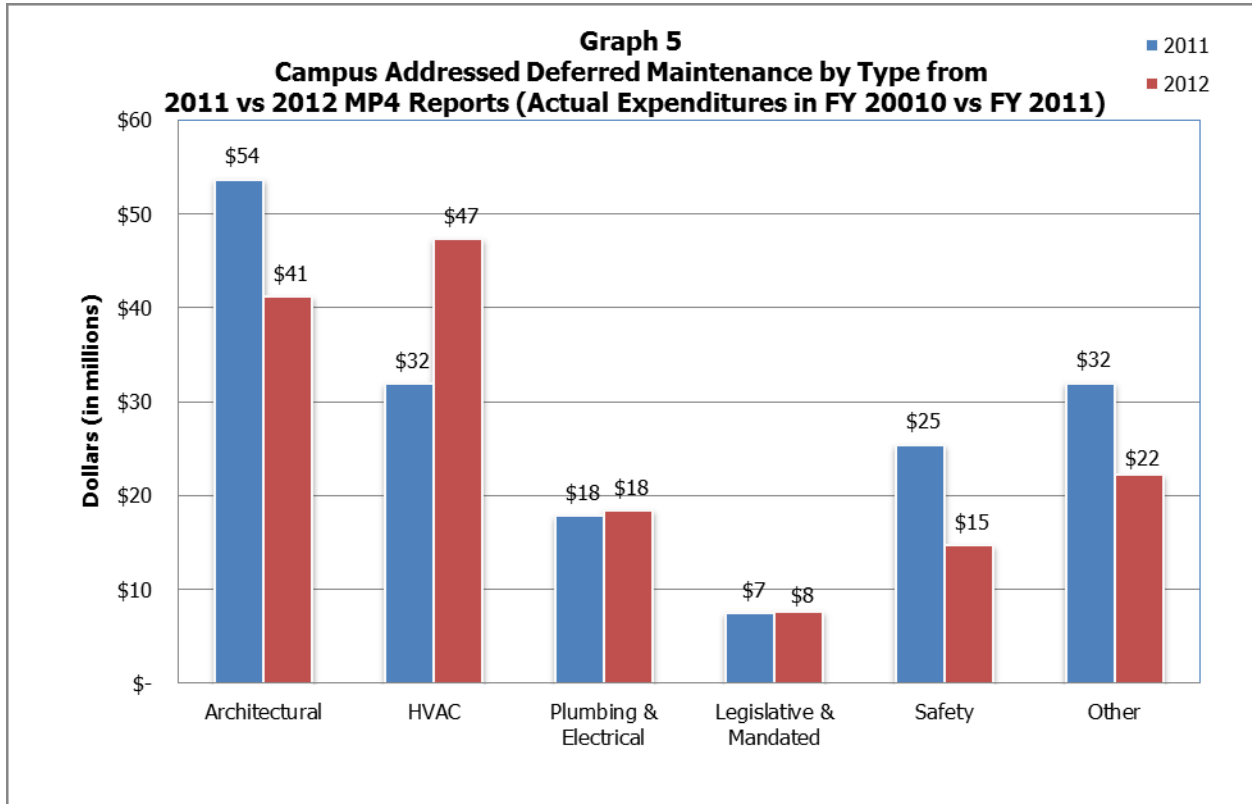

Graph 3 shows the total plans for FY 2012 – 2016 by project type. Thirty-two percent of the funding is dedicated to architectural projects and another 37 percent to Heating, Ventilation, and Air Conditioning (HVAC). This distribution remains consistent with previous years' planned expenditures by project type.

The planned five-year expenditures by project type for FY 2012 compared to FY 2011 (Graph 4) indicate that Architectural spending is up 2 percent from FY 2011, and HVAC spending is up 22 percent from FY 2011, while Safety and Other spending show average reductions of 20 percent.

Source: MP2 reports for FY 2011 – 2012. See Table 3, *Planned Deferred Maintenance by Type*.

The graph below shows the distribution of expenditures submitted in the FY 2011 and FY 2012 MP4 reports. The institutions reported \$151 million in actual deferred maintenance expenditures for FY 2011 during the FY 2012 reporting process. This is \$17 million less than what was reported for actual expenditures for FY 2010. All categories with the exception of HVAC decreased in expenditures an average of 18 percent, with the greatest percentage increase in HVAC (48 percent).

Source: MP4 reports for 2011 – 2012. See Table 4, *2011 MP4 Summary, Actual Expenditures for FY 2011*, which summarizes reported expenditures by institution.

## The Campus Master Planning Process

Section 17.101 of the Coordinating Board's rules and regulations provides the mechanism for fulfilling the intent of the law. All general academic institutions, technical and state colleges, as well as health-related institutions, are required to submit data to the Coordinating Board for the following reports:

17.101 (2) Facilities Development Reports. The Board shall consider projects that are included in the facilities development plans (MP1 and MP2). A project that is not included in the plan may be considered if the Board determines that the institution, even with careful planning, could not reasonably have foreseen the project need.

\*(B) Campus Condition Report (MP2). On or before 15 November of every year, an institution shall submit an update to its Campus Condition Report (MP2) on file with the Board. The report shall include:

(i) An institution's planned maintenance, deferred maintenance, critical deferred maintenance, and facility adaptation itemized by building and infrastructure for the previous year, current year, and the following four years;

(ii) Previous year's expenditures for planned maintenance, deferred maintenance, critical deferred maintenance, and facility adaptation itemized by building;

(iii) Current year's budgeted amount for planned maintenance, deferred maintenance, critical deferred maintenance, and facility adaptation itemized by building;

(iv) Current year's unbudgeted amount for planned maintenance, deferred maintenance, critical deferred maintenance, and facility adaptation itemized by building;

(v) Total amounts reported in clauses (i) - (iv) of this subparagraph for the entire campus classified in the following categories: architectural; HVAC; plumbing and electrical; safety; legal and mandatory; and other; and

(vi) The five priority projects the institution plans to accomplish in the current year.

The Coordinating Board uses deferred maintenance data to gauge how well institutions are taking care of their facilities. The data collected annually from each institution are compiled into a master database and summarized in a report.

The Board uses the ratios of deferred and critical deferred maintenance to building replacement value to evaluate construction project applications that are submitted for review. Deferred maintenance is considered critical if it places the institution's facilities, occupants, or mission at risk. Critical auxiliary deferred maintenance is not considered in the deferred maintenance to replacement value ratio because auxiliary enterprise entities receive funds through services provided. Currently, the Board standard requires the ratio of ADM to replacement value be 5 percent or less. The Board's standard for CDM is zero. A ratio above the standard may cause the Board to question whether proposed project funds might best be used to address the backlog of deferred maintenance on a campus.

\*These rules were amended to be effective November 29, 2010.

**Notes:**

1. From fall 2010 to 2011, critical deferred maintenance decreased 89 percent (from 16 to 1.8 million). Non-critical deferred maintenance increased 6 percent (from 700 to 740 million). Educational and General square feet decreased 1 percent (from 60 to 59 million). Index value remained unchanged at \$34 billion. The General Academic Institutions' base rate increased 3 percent (from \$285 to \$293). The Health-Related Institutions' base rate increased 2 percent (from \$286 to \$292).
2. The newly adopted "Campus Condition Index Value (CCIV)" methodology was applied to all institutions except Health-Related Institutions, which were calculated using the "Educational and General Replacement Value (RV)" methodology.
3. Per rule 17.30, all institutions with a CCI rating of "Good" (defined as up to 5 percent deferred maintenance to index value) meet standard.

**Definitions:**

Critical Deferred Maintenance - Any deferred maintenance that if not corrected in the current budget cycle places its building occupants at risk of harm or the facility at risk of not fulfilling its functions.

Deferred Maintenance - The accumulation of facility components in need of repair or replacement brought about by age, use, or damage, for which remedies are postponed or considered backlogged, that is necessary to maintain and extend the life of a facility. This includes repairs postponed due to funding limitations. Deferred maintenance excludes on-going maintenance, planned maintenance performed according to schedule, and facility adaptation items.

Education and General (E&G) - Space used for teaching, research, or the preservation of knowledge, including the proportional share used for those activities in any building or facility used jointly with auxiliary enterprise, or space that is permanently unassigned. E&G space is supported by state appropriations.

Index Value - The institution-wide relative value of an institution's facilities, as determined annually by the Board. The method of calculation is based on approved Board project costs. Campus Condition Index Values are calculated for Educational and General (EGCCIV) space and Institution-Wide (IWCCIV) space. A 25 percent add-on is included to account for the cost of necessary infrastructure. These are NOT to be used for insurance purposes.

Net Assignable Square Feet (NASF) - The sum of all areas within the interior walls of rooms on all floors of a building assigned to, or available for assignment to, an occupant or use, excluding unassigned areas. NASF includes auxiliary space and E&G space.
