KEY CHANGES AND
IMPROVEMENTS

EXAMPLES

Transition Overview & Timeline

From MoveIT to the Data Submission Portal

Transition Overview

The **migration of the CBM002 (Texas Success Initiative Report) to the Data Submission Portal (DSP)** is part of the larger Data Modernization Project that aims to make data more accessible, secure, and actionable for informed decision-making in higher education.

Transition Timeline

- **Week of May 18, 2026:** Spring CBM002 submissions open in the new portal.
- **Affected Sectors:** Public universities, community, technical, and state colleges.
- **Legacy Tool Sunset: MOVEit** will no longer be utilized for CBM002 submissions.
- **New Standard:** All future reports must be submitted via the CBPass Data Submission Portal.

Key Changes & Improvements

Key Changes & Improvements

Clear Messages

Error and questionable messages now lead with specific Item Numbers for faster identification along with a statement explaining the validation issue.

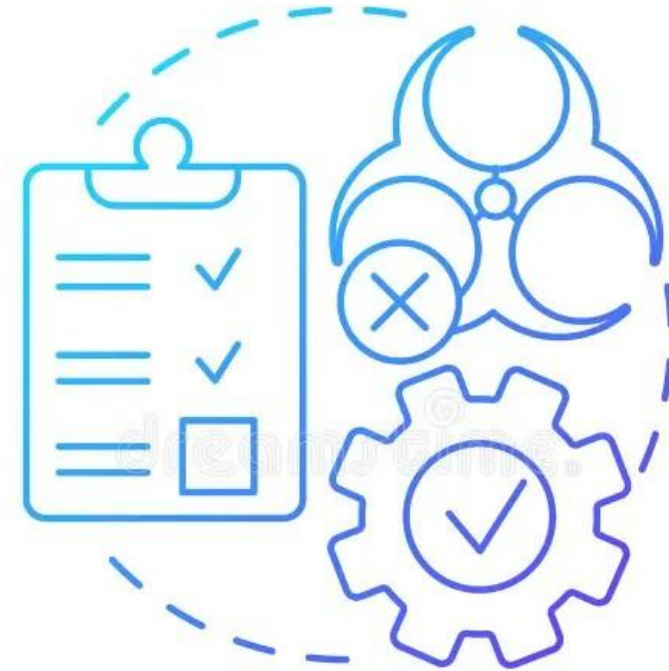

CSV Downloads

Full questionable and error record list are available for download in CSV format for easy filtering and sorting.
Note: Only first 100 are displayed in the report.

Key Changes & Improvements

Enhanced Validations: New data validation checks have been implemented to ensure high-quality reporting from the outset. **Some items previously flagged as questionable are now errors and will require correction PRIOR to certification.**

**VALIDATION AND
VERIFICATION**

Requesting Certification

Once you have an error free file, **DO NOT REQUEST CERTIFICATION IN THE PORTAL** just yet.

This area is undergoing final testing.

Your respective THECB Reporting Liaison will let you know when it is ok to do so.

Examples

Report Functionality and Key Validation Update

Report Functionality (Cross-checks)

There are no changes to the CBM002 report cross-checks.

- **CBM002/CBM00S**
 - Undergraduate students reported on the CBM00S must have a corresponding record on the CBM002.
- **CBM002/CBM0E1**
 - Undergraduate students reported on the CBM002 must have a corresponding record on the CBM0E1.

Validation Error Items - Displaying 10 Records per Validation Rule. [Download CSV](#) for all records

RECORD ID	MESSAGE
28	Item #62B Writing Assessment Score is not between 910 and 990 when Item #62A Writing Assessment Test is '9' - TSI Assessment 2.0
28	Item #62B Writing Assessment Score is not between 910 and 990 when Item #62A Writing Assessment Test is '9' - TSI Assessment 2.0
28	Item #42A Reading Assessment Test Used for Initial Placement value is not correct.
36	Item #22A Math Assessment Test Used for Initial Placement value is not correct.
36	Item #62A Writing Assessment Test Used for Initial Placement value is not correct.
36	Item #42A Reading Assessment Test Used for Initial Placement value is not correct.
47	Item #22A Math Assessment Test Used for Initial Placement value is not correct.
47	Item #62A Writing Assessment Test Used for Initial Placement value is not correct.
54	Item #62A Writing Assessment Test Used for Initial Placement value is not correct.

Key Validation Change (Diagnostic Level Scores)

- Significant validation change for Items **22B, 42B, and 62B**:
- Non-passing scores must have a corresponding **Diagnostic Level (DL) score** (Items **80/81/82**).
- Missing DL scores for non-passing scores in Items 22B, 42B, and 62B will now trigger an **Error** (*In the old system, this was a questionable*).
- Data must be corrected prior to requesting certification.

Key Validation Change (Diagnostic Level Scores)
