

Texas Statewide Course Sharing Exchange

The Texas Statewide Course Sharing Exchange is a collaborative program that allows students at select Texas institutions to take an online course at another institution. Course Sharing provides students with a convenient, searchable portal to find and register for courses offered at other participating Texas institutions if the courses are not available or offered at a convenient time at their home institution.

Course Sharing helps students stay on track with their course load, reducing tuition costs, and achieving their education goals quicker, all while giving them more flexibility.

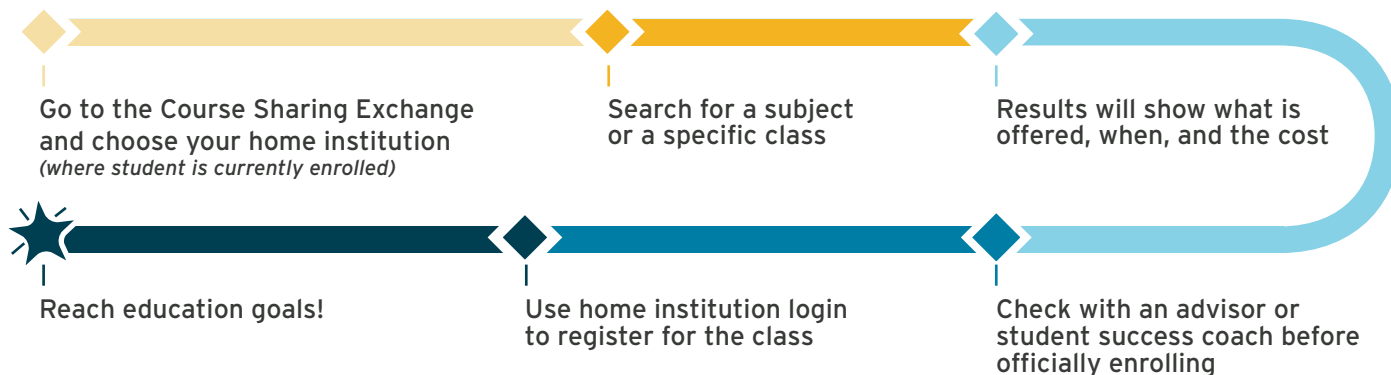

By the Numbers

25 participating
institutions across Texas

450+ course sections
available

The Process

Benefits for Institutions

- Expand course offerings without adding faculty
- Increase access to in-demand credentials and transfer pathways
- Share talent and reduce operational costs
- Generate revenue by filling seats in existing online course sections
- Progress toward collectively meeting the goals of Building a Talent Strong Texas

Benefits for Students

- Access to hundreds more online courses - subjects that aren't offered through home institutions, at more times
- No applications, application fees, or uploaded transcripts needed to register for a course via the exchange
- Classes have already been vetted and automatically count toward the degree or credential
- Stay on track for meeting education goals
